MANAGEMENT DISCUSSION AND ANALYSIS

ENDED MARCH 31, 2018

INTRODUCTION

The Management Discussion & Analysis has been prepared by management and reviewed and approved by the Board of Directors on May 30, 2018. The following discussion of performance, financial condition and future prospects should be read in conjunction with the unaudited quarterly condensed financial statements and the related notes thereto for the quarter ended March 31, 2018, and the audited financial statements for the period from inception to December 31, 2017. The information provided herein supplements but does not form part of the financial statements. This discussion covers the period ended March 31, 2018 and the subsequent period up to April 30, 2018, the date of issue of this MD&A. Monetary amounts in the following discussion are in Canadian dollars unless otherwise noted.

Additional information regarding the Corporation can be found on the Corporation's page at www.sedar.com.

The technical information presented herein has been reviewed by Dr. Petri Peltonen Ph.D., Chartered Professional of Australian Institute of Mining and Metallurgy (AusIMM), European Geologist (EurGeol), a consultant to the Company, and a qualified person as defined by National Instrument 43-101.

This MD&A contains Forward Looking Information.
Please read the Cautionary Statements on page 3 carefully.

FORWARD LOOKING STATEMENTS

This MD&A contains certain forward-looking statements or forward-looking information within the meaning of applicable Canadian securities laws. All statements and information, other than statements of historical fact, included in or incorporated by reference into this MD&A are forward-looking statements and forward-looking information, including, without limitation, statements regarding activities, events or developments that we expect or anticipate may occur in the future. Such forward-looking statements and information can be identified by the use of forward-looking words such as "will", "expect", "intend", "plan", "estimate", "anticipate", "believe" or "continue" or similar words and expressions or the negative thereof. There can be no assurance that the plans, intentions or expectations upon which such forward-looking statements and information are based will occur or, even if they do occur, will result in the performance, events or results expected.

The forward-looking statements and forward-looking information reflect the current beliefs of the Corporation, and are based on currently available information. Accordingly, these statements are subject to known and unknown risks, uncertainties and other factors which could cause the actual results, performance or achievements of the Corporation to be materially different from any future results, performance or achievements expressed in or implied by the forward-looking statements. This forward-looking information includes estimates, forecasts, plans, priorities, strategies and statements as to the Corporation's current expectations and assumptions concerning, among other things, ability to access sufficient funds to carry on operations, compliance with current or future regulatory regimes, particularly in the case of ambiguities, financial and operational performance and prospects, collection of receivables, anticipated conclusions of negotiations to acquire projects or investments, our ability to attract and retain skilled staff, expectations of market prices and costs, expansion plans and objectives, requirements for additional capital, the availability of financing, and the future development and costs and outcomes of the Corporation's projects or investments. The foregoing list of assumptions is not exhaustive. Events or circumstances could cause actual results to vary materially.

We caution readers of this MD&A not to place undue reliance on forward-looking statements and information contained herein, which are not a guarantee of performance, events or results and are subject to a number of risks, uncertainties and other factors that could cause actual performance, events or results to differ materially from those expressed or implied by such forward-looking statements and information. These factors include: unanticipated future operational difficulties (including cost escalation, unavailability of materials and equipment, industrial disturbances or other job action and unanticipated events related to health, safety and environmental matters); social unrest; failure of counterparties to perform their contractual obligations; changes in priorities, plans, strategies and prospects; general economic, industry, business and market conditions; disruptions or changes in the credit or securities markets; changes in law, regulation, or application and interpretation of the same; the ability to implement business plans and strategies, and to pursue business opportunities; rulings by courts or arbitrators, proceedings and investigations; inflationary pressures; and various other events, conditions or circumstances that could disrupt the Corporation's priorities, plans, strategies and prospects including those detailed from time to time in the Corporation's reports and public filings with the Canadian securities administrators, filed on [SEDAR](#).

This information speaks only as of the date of this MD&A. The Corporation undertakes no obligation to revise or update forward-looking information after the date of this document, nor to make revisions to reflect the occurrence of future unanticipated events, except as may be required under applicable securities laws or the policies of the TSX-V exchange.

FIREFOX GOLD CORP.

Management Discussion and Analysis

March 31, 2018

THE CORPORATION

The principle business of FireFox Gold Corp (“FireFox” or “the Company”) is the exploration and development of mineral properties in Finland. The Company owns or controls several exploration-stage properties in the country, further described in the following pages.

FireFox Gold Corp. (“FireFox” or “the Corporation”) was incorporated in the Province of British Columbia on June 16, 2017. The Corporation is a reporting issuer in British Columbia, and Alberta, but does not trade on a stock exchange.

RECENT EVENTS

Plan of arrangement

The Corporation was a wholly-owned subsidiary of Anacott Resources Corp. (“Anacott”) until a plan of arrangement was completed on July 28, 2017 under which the Corporation’s common shares were distributed to shareholders of Anacott on a pro-rata basis.

Finland exploration properties

On August 1, 2017 FireFox announced an agreement with Magnus Minerals Ltd. (“Magnus”), a company incorporated under the laws of Finland, whereby Magnus granted FireFox an exclusive right and option to earn and acquire a 100% interest in each of the Riikonkoski (East and West), Jeesiö (including Jeesiö West) and Ylöjärvi (including Oks) projects (the “Projects”), which are located in Finland and currently owned by Magnus (the “Option”).

Pursuant to the Option Agreement, FireFox is required to (among other things):

- (i) issue 6,000,000 common shares to Magnus (issued);
- (ii) incur and fund \$2.5M in exploration expenditures on the Projects as follows:
 - a. \$300,000 by August 31, 2018 (\$260,000 spent at Sept 30, 2017);
 - b. \$600,000 by August 31, 2019; and
 - c. \$1,600,000 by August 31, 2020;
- (iii) grant Magnus a 1.5% net smelter return royalty (the “NSR”), which may be reduced to 1% by the payment to Magnus of 1,000 troy ounces of gold within 90 days of publishing a positive feasibility study; and
- (iv) make an aggregate amount of \$250,000 in cash payments to Magnus as follows:
 - a. \$30,000 by August 31, 2018;
 - b. \$60,000 by August 31, 2019; and
 - c. \$160,000 by August 31, 2020.

The Option Agreement also provides that if FireFox exercises the Option, FireFox will be obligated to pay Magnus an additional payment equal to the value of 1,000 troy ounces of gold, within 12 months of the commencement of commercial production. Pursuant to the Option Agreement, Magnus has agreed to provide mineral exploration services to FireFox. At any time, FireFox may elect to stop making payments under the Option Agreement, which would result in the termination of the Option Agreement. Upon termination of the Option Agreement, FireFox would forego all of its rights to the Projects and any payments (including the issuance of shares) already made to Magnus or expended on the Projects.

Carl Löfberg, Managing Director of Magnus, is a director and the President and CEO of FireFox.

FIREFOX GOLD CORP.

Management Discussion and Analysis

March 31, 2018

Under the option agreement with Magnus, FireFox currently holds 100% exploration rights to three distinct gold tenement packages, namely “Ylöjärvi” located in Southern Finland, and “Riikonkoski” and “Jeesiö” both within the Central Lapland Greenstone Belt in Northern Finland.

Ylöjärvi property

The Company’s Ylöjärvi property (106.65 km² in total size) includes areas secured by either a valid exploration permit or a reservation. Ylöjärvi is located in the western branch of the Tampere Schist Belt, a volcano-sedimentary belt well-known for its historical and active gold mining.

The now closed Haveri Gold Mine, located only 200 meters from the Company’s reservation boundary, produced approximately 142,000 ounces gold and 6,000 t copper before being closed in 1960. Remaining mineral resources at Haveri are estimated to be 24.7Mt @ 0.89 g/t Au (reported in compliance with NI43-101 by a previous operator). Also, FireFox’s reservation surrounds the area of the historical Ylöjärvi Mine that produced small amounts of Cu, Au, Ag and W between 1943-1966. Some 30 kilometers west from Ylöjärvi, along the same sericite-altered volcanic sequence, Dragon Mining Ltd. (ASX: DRA) is operating its Orivesi Gold Mine that has produced in excess of 500,000 ounces gold.

FireFox cautions that being near a past-producing mine, with a resource, does not indicate that mineralization will occur on FireFox’s property, and if mineralization does occur, that it will occur in sufficient quantity or grade that would result in an economic extraction scenario. These facts were simply used to help prioritize the acquisition of these mineral rights.

In-house exploration targeting work emphasised the strong similarities in the chemical composition, style of alteration and structures of the volcanic sequences, and till and soil geochemistry of the Company’s property with those features observed near the gold mines of the region. In addition, the presence of numerous high grade glacial erratics and gold anomalies in till or soil imply the general prospectivity of the area. Additional exploration work will have to be performed in order to ascertain whether there is significant mineralization associated with these initial indicators.

The area of the Ylöjärvi tenement has seen only minor exploration work in the past. During the 2017 field season the Company conducted reconnaissance geological mapping, till sampling and Self Potential (SP) line surveys on selected targets. New grab samples assayed up to 7 g/t Au (7 samples exceeded 1g/t Au, and 17 samples had > 0.1 ppm Au), and FireFox was able to verify the extension of one of the historical drilled prospects (“Oks”) by another 1,000 meters along strike.

The Company plans to conduct additional mapping and percussion drill bottom-of-till sampling in order to further delineate these anomalies before finalizing details for a diamond core drill testing program.

Riikonkoski property

The second property, Riikonkoski, has been secured by two valid reservations totalling 109.2 km² in size. This tenement consists of three separate reservation blocks, all within or adjacent to the Sirkka Gold Line. The most recently added of these reservation blocks, “Saattopora,” is further described below. The Sirkka Gold Line is a pronounced Au-deposition controlling structure within the Central Lapland Greenstone Belt. In the immediate vicinity of the Riikonkoski tenement, two closed mines, Saattopora Au-Cu mine and Sirkka Cu-Ni-Co-Au-Ag mine, have been operated in the past. Further away, 22 kilometers northeast, Agnico Eagle Ltd. (TSE:AEM) is currently operating its Kittilä Gold Mine, with mineral resource of approximately 5 million ounces of gold.

FIREFOX GOLD CORP.

Management Discussion and Analysis

March 31, 2018

The main exploration target within this property is the Riikonkoski Cu-Au deposit. The Riikonkoski deposit has seen extensive historical exploration work in the past including approximately 20 kilometers of diamond drilling, that has been converted into a historic mineral resource estimate. FireFox has so far compiled much of the historical Riikonkoski data into a coherent data base and has assayed and re-assayed some of the historical Riikonkoski core in order to better understand the distribution of gold in the deposit. The Company has evaluated the drilling data in a three dimensional model and noted that certain of the historical drill intercepts for gold and copper are open at depth. FireFox may proceed with the preparation of an updated mineral resource for copper and gold, which would be reported in accordance with NI 43-101.

In December 2017, the Company added a new tenement block ("Saattopora") into the Riikonkoski Project. Saattopora reservation is located further west along the Sirkka Gold Line, relative to the Company's two other reservation blocks, and is 16.9 km² in size. The new reservation block partially surrounds the historic Saattopora Mine, held by Outokumpu Oyj. The now-idled Saattopora Mine produced approximately 220,000 oz Au and 5,650 t Cu between 1988-1995. The newly acquired tenement near Saattopora includes data from 39 historical diamond drill holes, which the Company will be reviewing in the near future.

Jeesiö property

The third property, Jeesiö, presently consists of six distinct tenement blocks, four of which are valid reservations and two have the status of valid exploration permits. The total size of the Jeesiö tenements is 464.19 km². Jeesiö was the Company's primary exploration target during the summer 2017 field season and is presently being subjected to till sampling and Induced Polarization surveys U (see below).

The northern boundary of the Jeesiö exploration permit application is only 2 km south from the recent Aamurusko gold-in-boulders discovery by Aurion Resources Ltd (TSX-V:AU), and 12 kilometers SSW from the Pahtavaara Gold Mine (350,000 oz. produced), currently being recommissioned by Rupert Resources Ltd (TSE:RUP). Numerous smaller drilled prospects and deposits are located in the vicinity of Jeesiö.

FireFox again cautions that being near a discovery, or past-producing mine with a resource, does not indicate that mineralization will occur on FireFox's property, and if mineralization does occur, that it will occur in sufficient quantity or grade that would result in an economic extraction scenario. These facts were simply used to help prioritize the acquisition of these pieces of property.

Portions of the Jeesiö property straddle the Sirkka Gold Line. Despite its location along the important controlling structure, Jeesiö area has seen only limited exploration work. Therefore, Jeesiö is considered a greenfield exploration target. The Jeesiö area has been covered by governmental regional till sampling programs, but only one small gold prospect, Homelampi, has been drill tested with 4 shallow holes. These holes returned low grades of the order of 0.1-0.3 g/t Au but over intervals several meters long. As the prospect is also associated with a pronounced geochemical till anomaly, the Company will allocate some resources for further study of the Homelampi target.

During the 2017 summer field season, the Company conducted reconnaissance geological mapping, till sampling and Self Potential (SP) surveys on selected targets that were highlighted by early targeting work. Altogether, 37 grab and 281 till samples were collected and assayed for Au and multielement trace element package, and approximately 150 line kilometers was surveyed by the SP method. The work identified zones anomalous in gold, arsenic and copper, some of them associated with SP anomalies. These will be followed up by bottom-of-till percussion drill sampling in Phase 2 exploration during the 2017-2018 winter season.

FireFox purchased and reprocessed governmental low-altitude airborne geophysical survey data. This project covers the entire Central Lapland Greenstone Belt and will allow further targeting of land to acquire outside the Company's current land package.

FIREFOX GOLD CORP.

Management Discussion and Analysis

March 31, 2018

During Q4 the Company entered into an Agreement to purchase 100% of the “Mustajärvi” gold exploration project in Central Lapland Greenstone Belt, Finland. The Vendor was Aurora Exploration Ltd, a junior exploration company based in Finland. Mustajärvi now forms part of the Jeesiö Project.

Mustajärvi (146.53 ha in size) is located adjacent to the southern branch of the “Sirkka Shear Zone”, a deep crustal structure that has controlled the emplacement of more than 40 gold deposits in the region. The mineralization is typical of an orogenic gold deposit hosted by albitized schists and volcanoclastic rocks, gold being associated with pyrite-bearing quartz and quartz-carbonate-turmaline veins. Only the topmost 50 meters of the bedrock, has been drill tested. Drilling by Outokumpu Co. yielded high grade intersections including 2.7m @ 14.6 g/t Au (from 20.7 meters), 12.0m @ 2.7 g/t Au (from 21.0 meters), 1.0m @ 18.8 g/t Au (from 41.0 meters). Mustajärvi is the main target during Company’s winter 2017-2018 exploration program. Percussion drill till sampling program has now been completed and an induced polarization survey is in progress. These will provide a solid basis on which to plan the diamond drilling program to be executed in the next phase of exploration, subject to the availability of financing.

SUMMARY OF QUARTERLY RESULTS

The Corporation was incorporated under the laws of the Province of British Columbia on June 16, 2017. As such, it has been in existence for only two of the past eight quarters.

Quarter ended	31-Mar-18	31-Dec-17	30-Sep-17	30-Jun-17
Revenue ⁽¹⁾	-	-	-	-
Loss for the quarter	\$ (560,653)	(539,548)	\$ (330,126)	\$ N/A
Loss per share	\$ (0.03)	(0.04)	\$ (0.02)	\$ (0.00)

Quarter ended	31-Mar-17	31-Dec-16	30-Sep-16	30-Jun-16
Revenue ⁽¹⁾	-	-	-	-
Loss for the quarter	\$ N/A	\$ N/A	\$ N/A	\$ N/A
Loss per share	\$ N/A	\$ N/A	\$ N/A	\$ N/A

⁽¹⁾ this being a corporation without a revenue-generating business, there are no revenues from operations or investments;

Loss for the quarter ended March 31, 2018

Losses of \$560,653 in the three months ended March 31, 2018 (“Q1-2018”) are most comparable to the three months ended December 31, 2017 (“Q4-2017”), as exploration activities were conducted in both periods, and the quarter ended September 30, 2017 was the Company’s first full quarter of operations. The largest cost in Q1-2018 was for mineral property exploration costs of \$396,258, incurred on FireFox’s new exploration properties. This compares with exploration costs of \$325,272 in Q4-2017. The increase was due to processing and analysis of airborne geophysical data.

Cash flows for the quarter ended March 31, 2018

The Corporation’s operating cashflow was negative, but was substantially lower than the loss for the quarter, due primarily to financing current activities through an increase in accounts payable and due to related parties. As a result, cash decreased by \$320,175 during the quarter as compared with a loss of \$560,653 for the quarter.

FIREFOX GOLD CORP.

Management Discussion and Analysis

March 31, 2018

LIQUIDITY AND CAPITAL RESOURCES

The Corporation had a working capital¹ deficit of \$22,138 as of March 31, 2018. The Corporation does not have revenues from operations, and relies on outside funding for its continuing financial liquidity. The Corporation will need additional financing in order to continue operations.

Management cautions that the Corporation's ability to raise additional funding is not certain, and additional funds will be required in order to pursue the Corporation's current business plans. An inability to raise additional funds would adversely impact the future assessment of the Corporation as a going concern.

The Company has announced a financing to raise up to \$750,000 (Note 7 of the condensed interim consolidated financial statements for the period ended March 31, 2018), but has not closed the financing as of the date of this MD&A.

CHANGES IN ACCOUNTING POLICIES

Accounting policies used in the quarter are as set out in the audited financial statements of the Company for the period ended December 31, 2017, with the adoption of updated policies to comply with evolving International Financial Reporting Standards, which are described in Note 2 of the condensed interim consolidated financial statements for the quarter ended March 31, 2018.

FINANCIAL INSTRUMENTS

The Corporation's financial instruments consist of cash, accounts receivable, accounts payable and accrued liabilities. It is management's opinion that the Corporation is not exposed to significant interest risk arising from the financial instruments. The Corporation is exposed to credit risk in relation to the receivables balances, however, most receivables are in relation to sales tax due from the Canadian government. Credit risk is managed for receivables by seeking prompt payment, monitoring the age of receivables, and making follow up inquiries when receivables are not paid in a timely manner. The Corporation does not engage in any hedging activities. Financial instruments do not generally expose the Corporation to risk that is significant enough to warrant reducing via purchasing specific insurance or offsetting financial instruments. Further discussion of these risks is presented in Note 4 of the Company's audited financial statements for the period ended December 31, 2017.

RELATED PARTY TRANSACTIONS

Key management compensation

Key management personnel at the Corporation are the directors and officers of the Corporation. The remuneration of key management personnel during the periods is as follows:

	Period ended March 31, 2018	
Director remuneration ¹	\$	18,000
Officer remuneration ¹	\$	46,375
Share-based payments	\$	7,946

¹ Working capital, a non-GAAP-measure is defined as current assets net of current liabilities.

FIREFOX GOLD CORP.

Management Discussion and Analysis

March 31, 2018

¹ Remuneration consists exclusively of salaries, bonuses, health benefits if applicable and consulting fees for key management personnel.

Other than the amounts disclosed above, there were no short-term employee benefits or share-based payments granted to key management personnel during the period ended March 31, 2018.

In accordance with Item 1.9 of Part 2 of Form 51-102.F1 the Corporation has no ongoing contractual commitments with related parties, apart from those established under the employee-employer or service-provider relationship, and the mineral property option agreement with Magnus, further described in Note 4 of the condense interim consolidated financial statements for the period ended March 31, 2018. Amounts are recorded at the exchange amount agreed between the parties. Remuneration was paid or is payable to Anacott (\$8,000) for services of the Chief Financial Officer.

Magnus and Anacott Resources Corp. ("Anacott") are each considered related parties to FireFox by virtue of having an officer in common with FireFox. FireFox has contracted with Magnus to provide mineral exploration services, and with Anacott to provide CFO and administrative services. During the period ended March 31, 2018, Anacott Resources Corp. provided administrative and property investigation services valued at \$16,375, Carl Löfberg provided management services valued at \$30,000, Highsmith Consulting provided management services valued at \$18,000 while Magnus provided exploration and property investigation services valued at \$220,492.

Accounts payable and accrued liabilities

Included in accounts payable and accrued liabilities at March 31, 2018 is \$5,310 due to Anacott, in relation to key management compensation as well as costs paid to third parties on the Corporation's behalf. In addition, \$204,965 is due to Magnus in relation to mineral exploration services.

Plan of arrangement

The Corporation was a wholly-owned subsidiary of Anacott Resources Corp. ("Anacott") until a plan of arrangement was completed on July 28, 2017 under which the Corporation's common shares were distributed to shareholders of Anacott on a pro-rata basis.

RISK FACTORS AND MANAGEMENT'S RESPONSIBILITY OVER FINANCIAL REPORTING

Risk Factors

Early-stage entities face a variety of risks and, while unable to eliminate all of them, the Corporation aims to manage and reducing such risks as much as possible.

Exploring for minerals is a highly technical and complicated process. As FireFox is a new company, it has not built a large technical team. The Corporation has entrusted, and is reliant upon the experienced and dedicated team at Magnus to conduct the exploration programs on behalf of FireFox.

The risks that management considers most important in the context of the Company's business are listed in this section. They are not listed in order of importance, nor are they inclusive of all the risks to which the Company may be subject. Sources of risk to the Company and its businesses include: reliance on key personnel; substantial capital requirements, exploration and development uncertainties, property commitments, operational risks associated with mineral exploration and development, environmental risks, commodity price fluctuations, economic and financial market instability, governmental regulation and policy, changes to government laws and regulations, risk related to the cyclical nature of the mining business, risk of title defects in mineral properties, lack of revenue and negative cash flow, legal and litigation risk, insurance risk, currency risk, conflicts of interest, time and cost estimates, consumables availability and costs, mineral resource uncertainties, and taxation.

FIREFOX GOLD CORP.*Management Discussion and Analysis*

March 31, 2018

The following risk factors should be given special consideration when evaluating an investment in any of the Company's securities:

- a) the Company has had no profitable business activity and has not acquired any material assets since its incorporation other than cash;
- b) the Company does not have a history of earnings, nor has it paid any dividends and will not generate earnings or pay dividends in the foreseeable future;
- c) the Company has only limited funds with which to continue its exploration and development opportunities and there can be no assurance that the Company will be successful in discovering economically recoverable minerals;
- d) the exploration and development opportunities being pursued may be financed in all or part by the issuance of additional securities by the Company and this may result in further dilution to the investor, which dilution may be significant and which may also result in a change of control of the Company;
- e) there can be no assurance that an active and liquid market for the common shares will develop and an investor may find it difficult to resell its common shares; and
- f) if the Company fails to progress its exploration and development opportunities, an interim cease trade order may be issued against the Company's securities by an applicable securities commission.

OFF BALANCE SHEET ARRANGEMENTS

The Corporation has not entered into any off-balance sheet arrangements.

OUTSTANDING COMMON SHARES DATA

The following section updates the outstanding share data provided in the condensed interim consolidated financial statements for the period ended March 31, 2018.

Common shares:
