

Gold Discovery in Finland

JANUARY 2020

FIREFOXGOLD

TSX-V: FFOX FSE: A2PDU7

Readers Advisory

This corporate presentation (the “Presentation”) has been prepared by management of Firefox Gold Corp. (the “Corporation”) as of October 2019, and is based on public information and the Corporation’s publicly available information. This Presentation is for information purposes only and is being made available solely to enable current and prospective investors to evaluate the securities of the Corporation (the “Securities”). This Presentation does not constitute an offer to sell to any person, or a general offer to the public of, or the general solicitation from the public of offers to subscribe or purchase, any of the Securities. Any unauthorized use of this Presentation is strictly prohibited. Distribution or copying of this Presentation, in whole or in part in any medium, to any person other than the prospective investor is prohibited without the prior written consent of the Corporation. The information contained in these slides, the Presentation made to you verbally and any other information provided to you (in writing or otherwise) in connection with the Corporation and its business (the “Presentation Materials”) may be subject to updating, completion, revision, verification and amendment by the Corporation or by the third parties referenced herein without any notice to you, and which changes may result in material changes to the information presented herein. The Corporation does not assume the obligation to revise or update any information provided to you, in writing or otherwise, except as may be specifically required under applicable securities laws. The Presentation Materials are not intended to provide financial, tax, legal or accounting advice and do not purport to contain all the information that a prospective investor may require. Each prospective investor should perform and rely on its own investigation and analysis of the Corporation and the terms of any offering of the Securities, including the merits and risks involved, and are advised to seek their own professional advice on the legal, financial and taxation consequences of making an investment in the Corporation. In particular, any estimates or projections or opinions contained herein necessarily involve significant elements of subjective judgment, analysis and assumption and each recipient should satisfy itself in relation to such matters. The Securities are highly speculative.

Certain information contained herein includes market and industry data that has been obtained from or is based upon estimates derived from third party sources, including industry publications, reports and websites. Third party sources generally state that the information contained therein has been obtained from sources believed to be reliable, but there is no assurance or guarantee as to the accuracy or completeness of included data. Although the data is believed to be reliable, neither the Corporation nor its agents have independently verified the accuracy, currency or completeness of any of the information from third party sources referred to in this Presentation or ascertained from the underlying economic assumptions relied upon by such sources. The Corporation and its agents hereby disclaim any responsibility or liability whatsoever in respect of any third party sources of market and industry data or information.

No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon the Presentation Materials, and any representation to the contrary is an offence. Neither the Corporation nor any agent of the Corporation makes any representation or warranty, express or implied, and assumes no responsibility for the accuracy or completeness of the information contained in the Presentation Materials or any other oral or written communication transmitted to prospective investors, and nothing contained in this summary is, or shall be relied upon as, a promise or representation by the Corporation or any agent of the Corporation as to the past or future performance of the Corporation. The Corporation does not undertake to provide any additional further information or to enter into negotiations regarding the investment opportunity to which these Presentation Materials relate. The Corporation retains the right, at any time, to terminate any discussions or negotiations with prospective investors. In the event of such termination the Corporation will not be under any obligation to disclose the reasons for such termination nor will they have any liability to any recipient hereof for any costs whatsoever incurred in the consideration of the information contained in these Presentation Materials.

Qualified Person

Scientific and technical information contained in these slides with respect to Firefox has been reviewed and approved by Patrick Highsmith, MSc, CPG, who is a Qualified Person as that term is defined in Canadian National Instrument 43-101. Mr. Highsmith is not independent of Firefox as he owns shares of the Corporation and is its Chairman of the Board.

References and End Notes

Sources of information and additional important cautionary language linked to numbered citations within this Presentation are shown on slide 26. Also see additional cautionary language in slide 3 and elsewhere herein.

Forward Looking Information

Both these slides and the accompanying oral presentation (if any) may contain certain forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 and forward-looking information within the meaning of the Securities Act (Ontario) and the Securities Act, R.S.B.C. Forward-looking statements can be identified by the use of words such as “plans”, “expects” or “does not expect”, “is expected”, “budget”, “scheduled”, “estimates”, “forecasts”, “intends”, “anticipates” or “does not anticipate”, or “believes”, or variation of such words and phrases or statements that certain actions, events or results “may”, “could”, “should”, “would”, “might” or “will” be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Firefox to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements.

The forward-looking statements in these slides and the oral presentation (if any) may include estimates, forecasts, and statements as to management’s expectations with respect to, among other matters, price and demand outlook for various commodities, expectations of size, amount, grade, metallurgy or other characteristics of deposits being explored for, the ability to obtain additional exploration licenses and/ or retain existing exploration licenses, plans for drilling programs and the timing thereof, the availability of financing, the timing and size of future financings and the price thereof, use of proceeds for various projects, continued working relationship with Magnus Minerals, future liquidity events and the timing thereof, future capitalization of the Corporation, work programs in respect of the Corporation’s properties, 2019 budget amounts and allocations and timing thereof, or expected project result or timelines. These forward-looking statements involve numerous assumptions, risks and uncertainties and actual results may vary materially.

These statements are based on a number of assumptions, including, but not limited to, assumptions regarding general business and economic conditions, interest rates, the supply and demand for, inventories of, and the level and volatility of prices of gold, copper, nickel and other primary metals and minerals explored for by Firefox, Firefox’s costs of exploration, as well as those of its competitors, ability to obtain licenses, access to equipment, fuel and power prices, ability to raise additional funds through equity offerings on terms acceptable to the Corporation, market competition, our ongoing relations with our employees and partners and joint ventures, performance by counterparties of their contractual obligations, and the future operational and financial performance of the Corporation generally.

The foregoing list of assumptions is not exhaustive. Events or circumstances could cause actual results to differ materially. Factors that may cause actual results to vary include, but are not limited to: adverse developments in business and economic conditions in the principal markets for Firefox’s products or proposed future products, in financial markets, or in the supply, demand, and prices for metals and other commodities to be produced, changes in interest and currency exchange rates, changes in the risk appetite of investors in the exploration sector, failure of customers or counterparties to perform their contractual obligations, inaccurate geological or metallurgical assumptions (including with respect to the potential size, grade and recoverability of anticipated future mineral resources), changes in taxation regimes, changes in mineral exploration regimes, legal disputes or unanticipated outcomes of legal proceedings, unanticipated operational difficulties (including failure of plant, equipment or processes to operate in accordance with specifications or expectations, cost escalation, unavailability of materials and equipment, government action or delays in the receipt of permits or government approvals, industrial disturbances or other job action, and unanticipated events related to health, safety and environmental matters), failure to raise additional funds on terms acceptable to the Corporation, or at all, and changes in general economic conditions or conditions in the financial markets.

Certain of these risks are, or may be, described in more detail in the annual financial statements and other publicly available information of the Corporation which is available at www.sedar.com once filed. The forward-looking statements in this Presentation are made as of the date hereof. The Corporation does not assume the obligation to revise or update these forward-looking statements after the date of this document or to revise them to reflect the occurrence of future unanticipated events, except as may be required under applicable securities laws. All forward looking statements contained in this Presentation are expressly qualified by this cautionary statement.

INVESTMENT HIGHLIGHTS

Innovative Platform

Tight structure of a newly listed company
Paired with a strategy built over time
Focused solely on gold in Finland

Competitive Advantage

A balance of technical and financial strengths:
Seasoned gold industry leadership
Paired with deep Finland expertise

Excellent Jurisdiction

Finland ranked 1st by Fraser Institute in 2017
Strong mining tradition and clear mining law
World-leading technical databases

Commanding Positions

Gold prospectivity in a greenstone setting
Control of ~1500 km² in two major gold belts
Strategic positions for short-term discoveries

Ripe for Discovery

High-grade showings over a large area
New gold targets in key discovery areas
Multiple active exploration programs

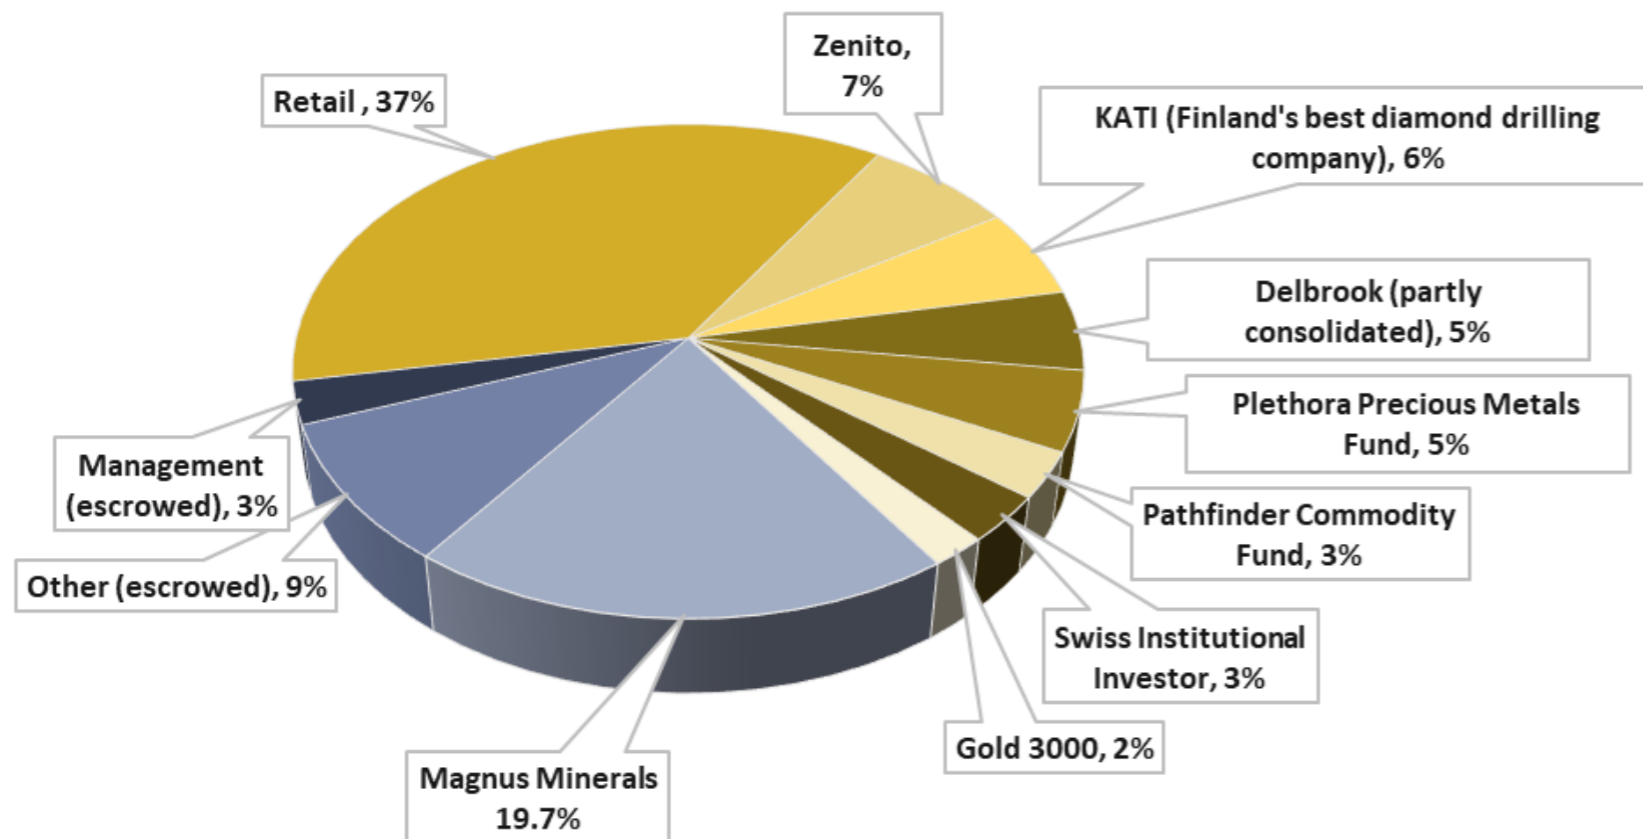

Conceptualized over a decade ♦ Created in 2017 ♦ Actively exploring since ♦ IPO in December 2018

Share Structure @ November 20 th , 2019							
Issued & Outstanding	43.2M	Warrants	15.6M	Options	3.5M	Fully Diluted	62.3M

Share Capital Distribution

Peer Group Well Received by the Market

(See Reference 1 for source information)

Carl Lofberg, CEO & Director, MSc

Has a Master's degree in Industrial Economics and broad experience in business consulting, project management, company start-ups and financing. An economist and precious metals investor, and an expert in hard currency and contrarian business strategy. He has been Managing Director for Magnus Minerals since 2006.

Patrick Highsmith, Chairman, MSc, CPG

A professional geologist and mining executive with experience on +250 projects around the world, leading teams through creative transactions, new discoveries, scoping, and prefeasibility studies. A veteran of the capital markets, and all manner of financings and transactions. Has been targeting gold in Finland since 2005, and was integral in building FireFox. He is currently Group Manager, Business Development for Fortescue Metals Group.

Joe Mullin, Director

A corporate finance and restructuring professional. Previously a Financial Analyst in the Investment Banking Division at Goldman Sachs, a Private Equity Research Analyst at WL Ross/Invesco Ltd. and a Portfolio Manager at Millennium Global Investments Ltd. Currently, he is a Partner and Director of 5P Investment Partners LLC, and he is a Partner of Mount Arvon Partners (Joseph E. Mullin LLC), which provides consulting and restructuring services.

Timo Maki, Director

Mr. Maki is an experienced geologist who resides in Finland. He was most recently the Chief Geologist at First Quantum's Pyhäsalmi Mine, where he worked from 1988-2018. He is credited with the discovery of the Mullikkoräme zinc deposit in 1987 and Pyhäsalmi deep deposit in 1996.

Andrew MacRitchie, CPA, CA, CFO

Mr. MacRitchie is a Chartered Public Accountant who has held management roles in a number of TSX Venture-listed mining companies over his 18-year career. During that period, he has assisted those companies in raising more than \$100 million.

Petri Peltonen, PhD, Exploration Manager

Over 25 years experience in geoscientific research, exploration and mining. Most recently he was engaged as Exploration Manager Europe for First Quantum Minerals Ltd. An accredited Chartered Professional of Australian Institute of Mining & Metallurgy (AusIMM), European Geologist (EurGeol), and SEG Fellow. He also serves as Professor of Economic Geology at the University of Helsinki.

Richard Goldfarb, PhD, Technical Advisor

More than 40 years of experience as an exploration geologist, researcher and professor.. He is a world-renowned expert on the geology of gold deposits with an emphasis on orogenic gold. Dr. Goldfarb's specialty is target generation and optimization in greenfields exploration for orogenic gold. In addition to operating a well known geological consultancy, he is a Research Professor at the Colorado School of Mines as well as a Fellow and former President of the Society of Economic Geologists.

Alf Björklund, PhD, Technical Advisor

Dr. Björklund brings more than 50 years of experience in geoscientific research & application to mineral exploration in Scandinavia, Russia, Brazil, Portugal & Canada. Trained as an exploration geochemist, he is also a former chief geochemist for the Geological Survey of Finland. He has been a Professor of Geology at Abo Akademi University. He is a co-founder and CEO of SES Finland Ltd and former chairman of the Board for Magnus Minerals.

Long history of gold exploration produced log normal distribution of gold deposits in similar sized belts²

The Central Lapland Greenstone Belt (CLGB) in the Fennoscandian Shield is comparable in size to other major greenstone belts but lacks the same distribution of deposits ...potentially due to a shorter exploration time frame.

“Newmont drills more for gold in one year in Nevada alone than has ever been spent on gold drilling in the history of the CLGB.”

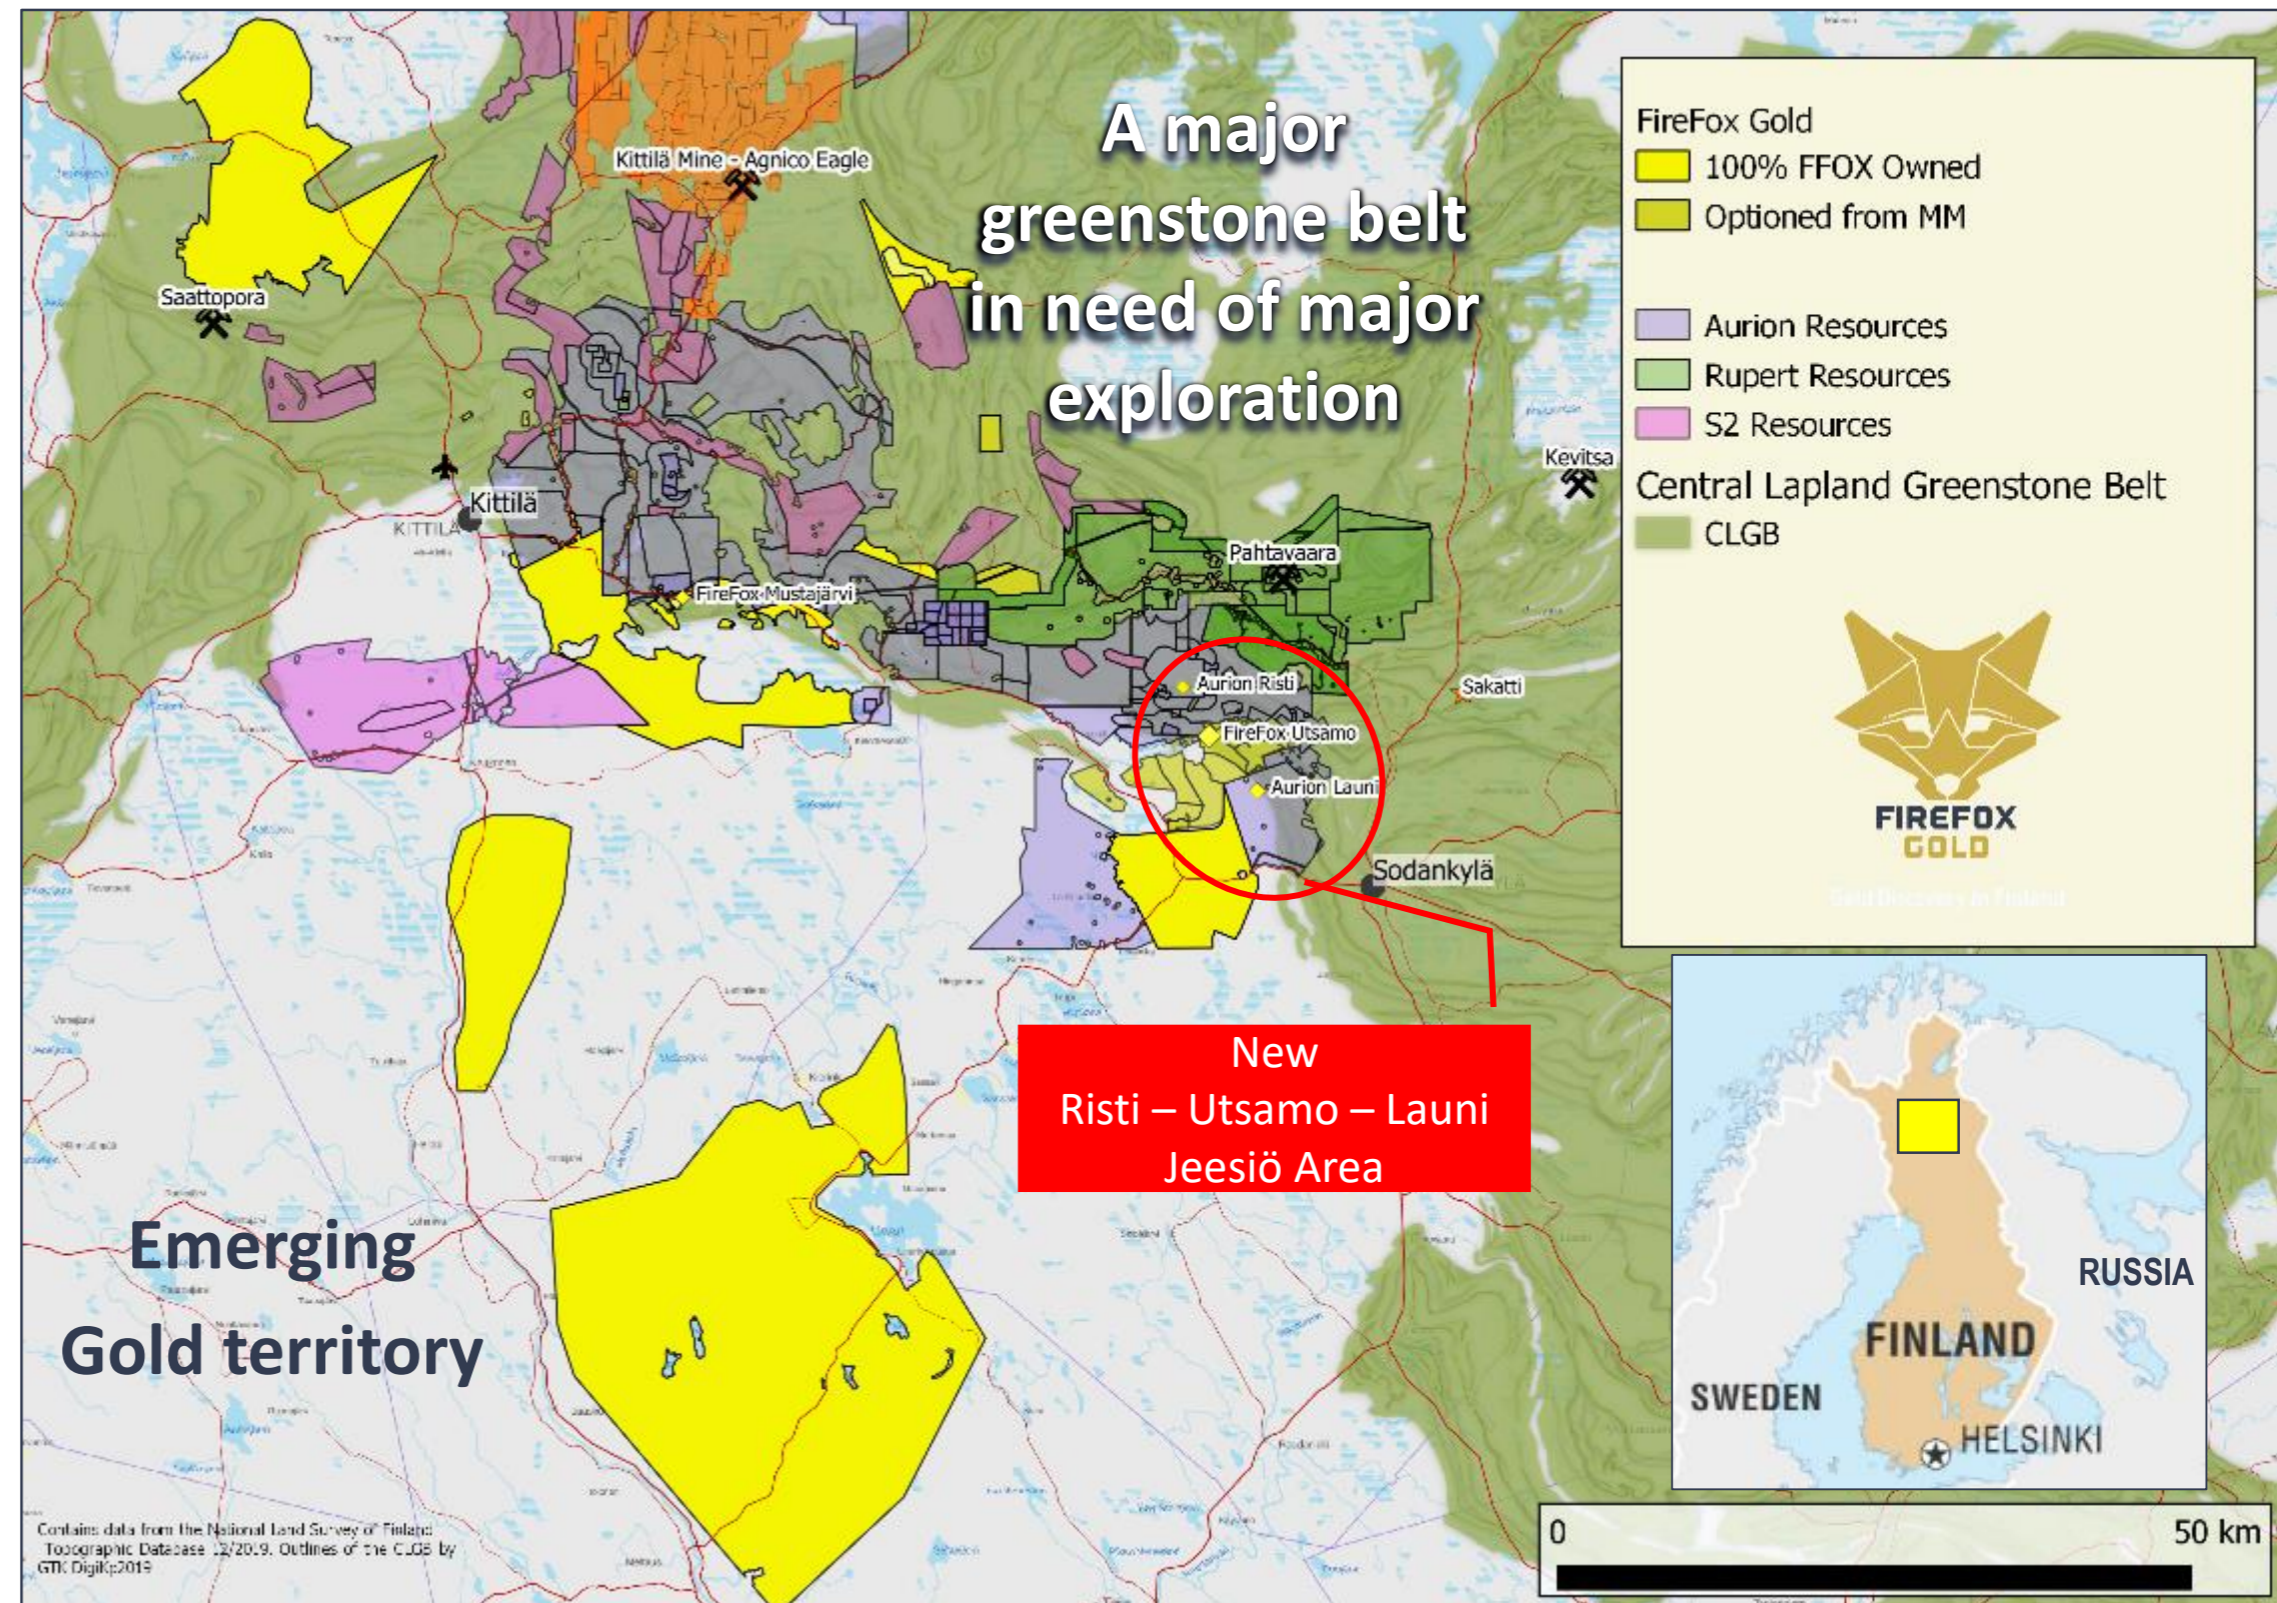

Patrick Highsmith, then Manager, Business Development Newmont (2005)

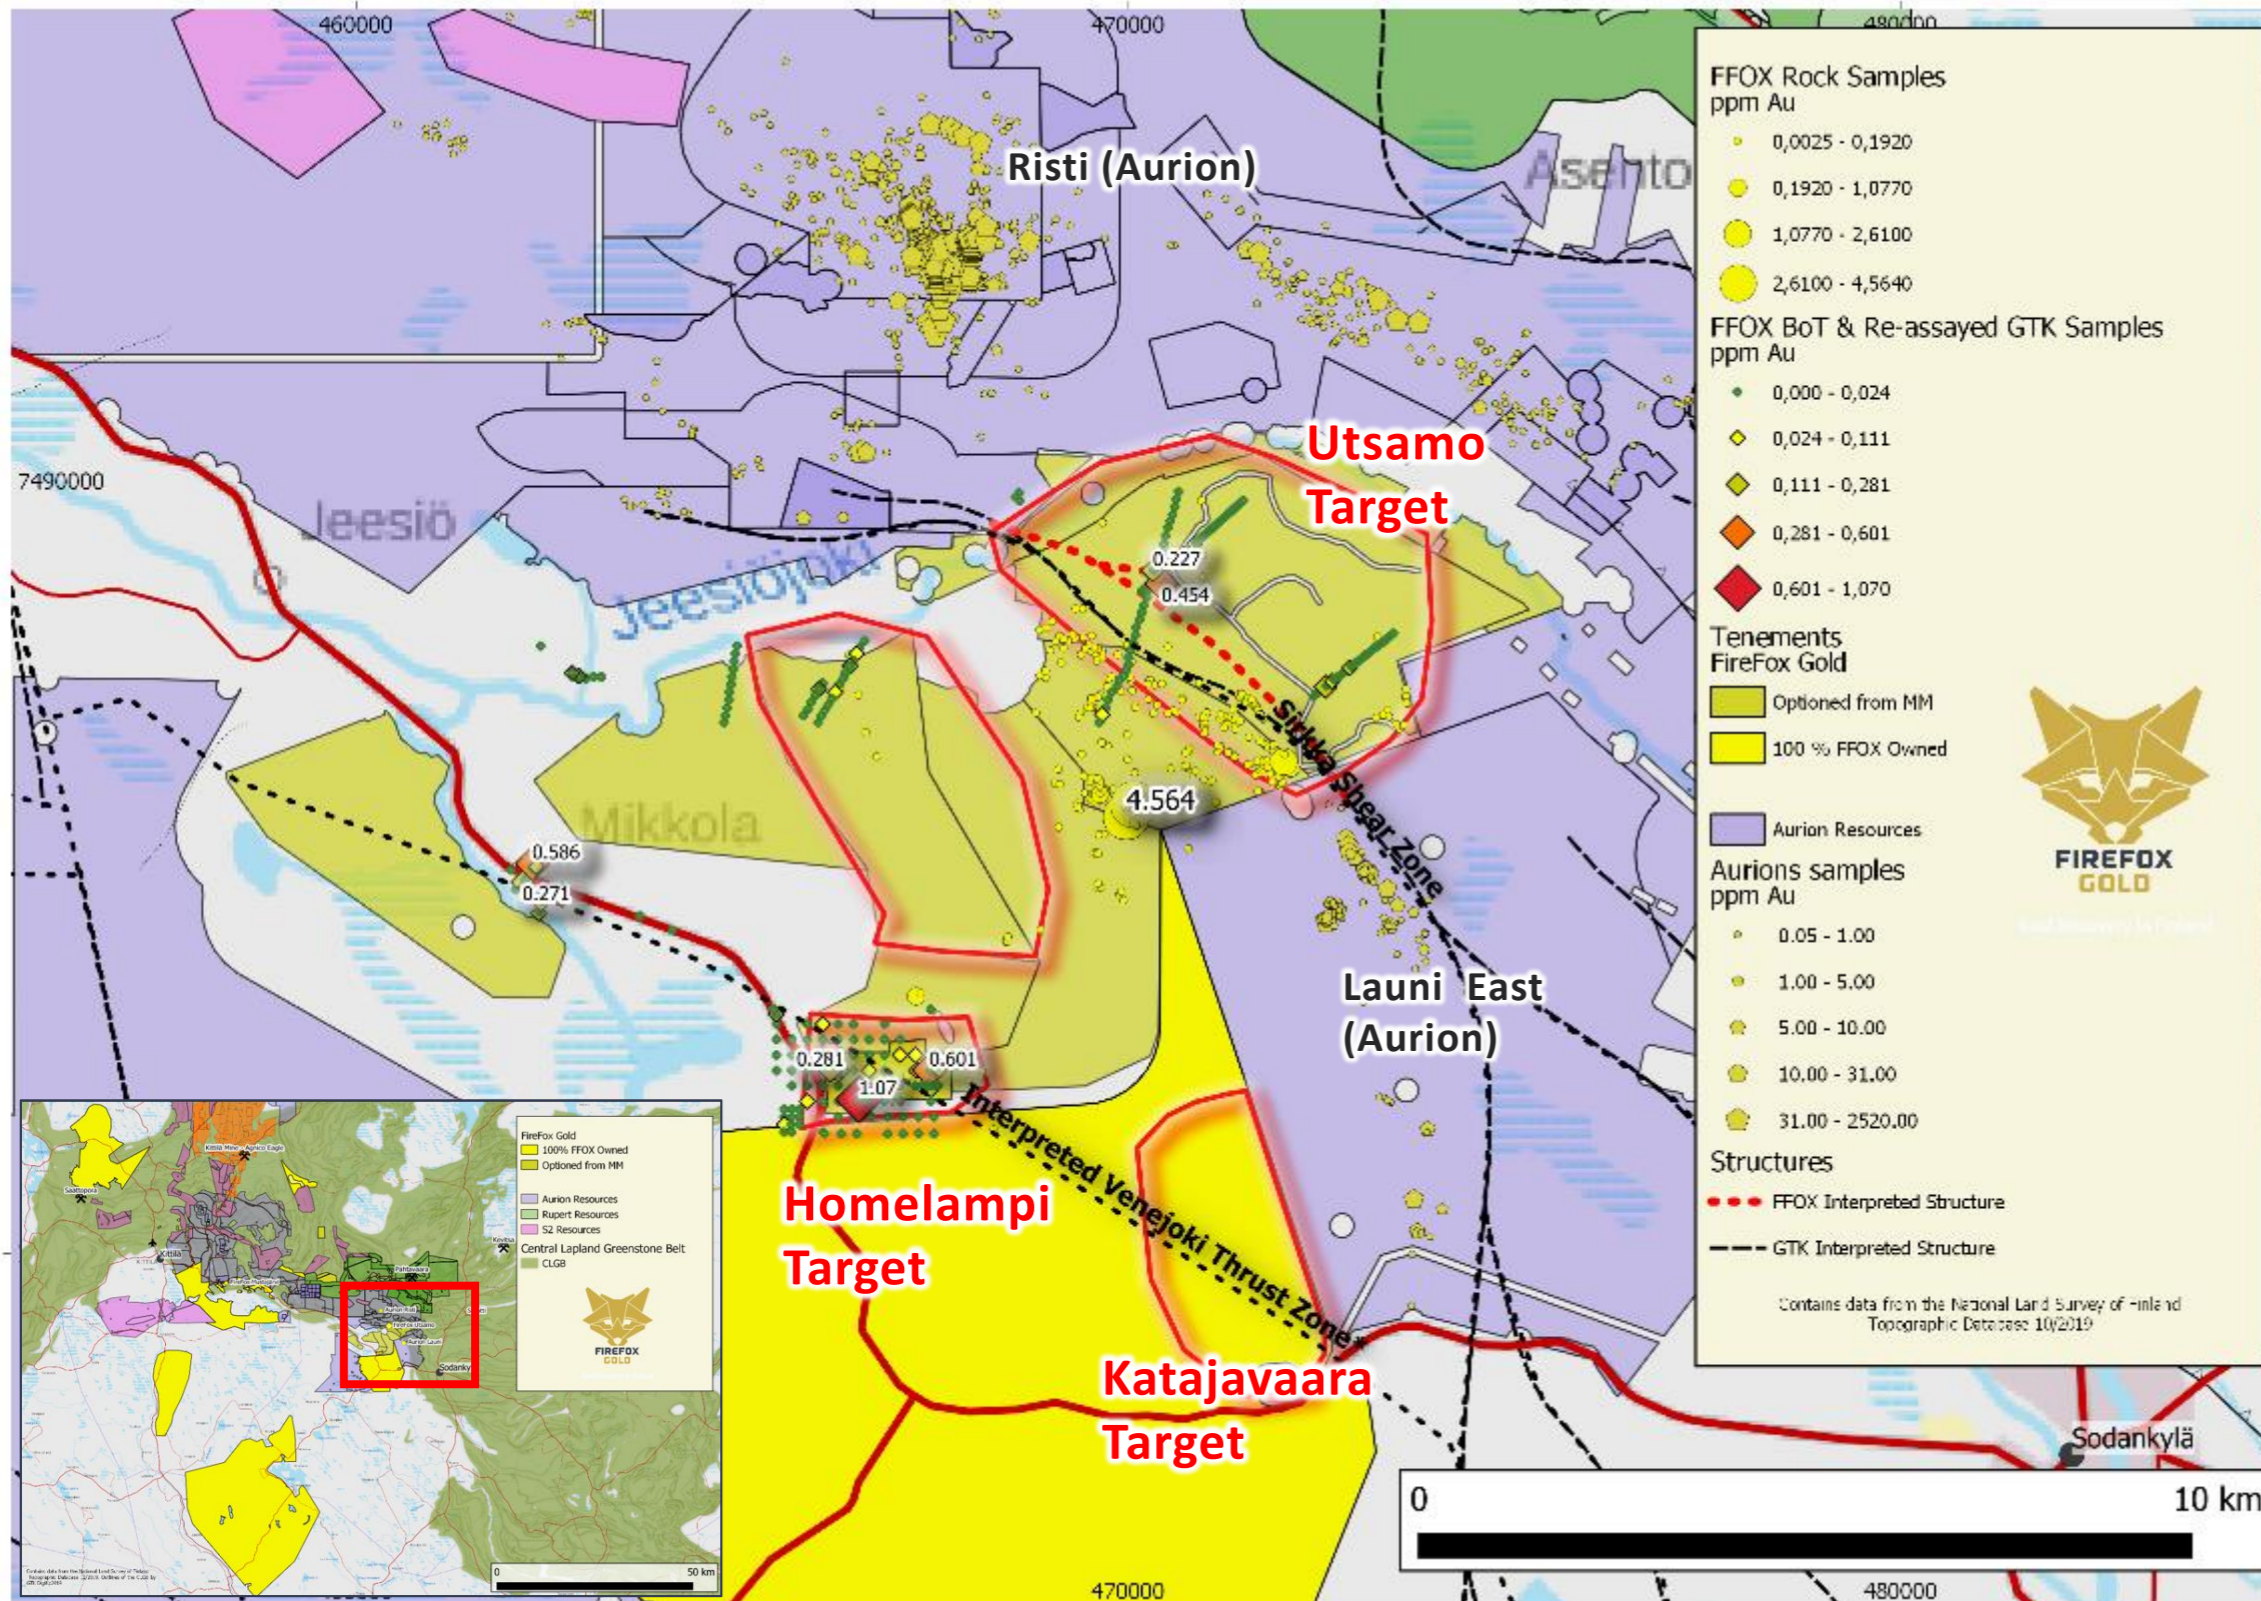

Only 5 companies actively exploring for gold³ in the CLGB.

FireFox controls ~500 km² - a significant portion of the prospective ground in the belt, including strategic positions within recent discovery corridors.

In addition, FireFox has acquired >900km² in newly-identified prospective areas to the south of the CLGB.

Jeessio hosts multiple orogenic gold targets with significant historic investment⁵.

Extensive gold in till anomalies from historic surveys aided identification⁴.

The new target areas are defined by interpretations of geochemistry and geology.

Targets also closely associated with the Sirkka and Venejoki Thrust Zones⁶ (STZ and VTZ).

The Utsamo target is situated between the recent discoveries by Aurion³, (Risti and Launi East).

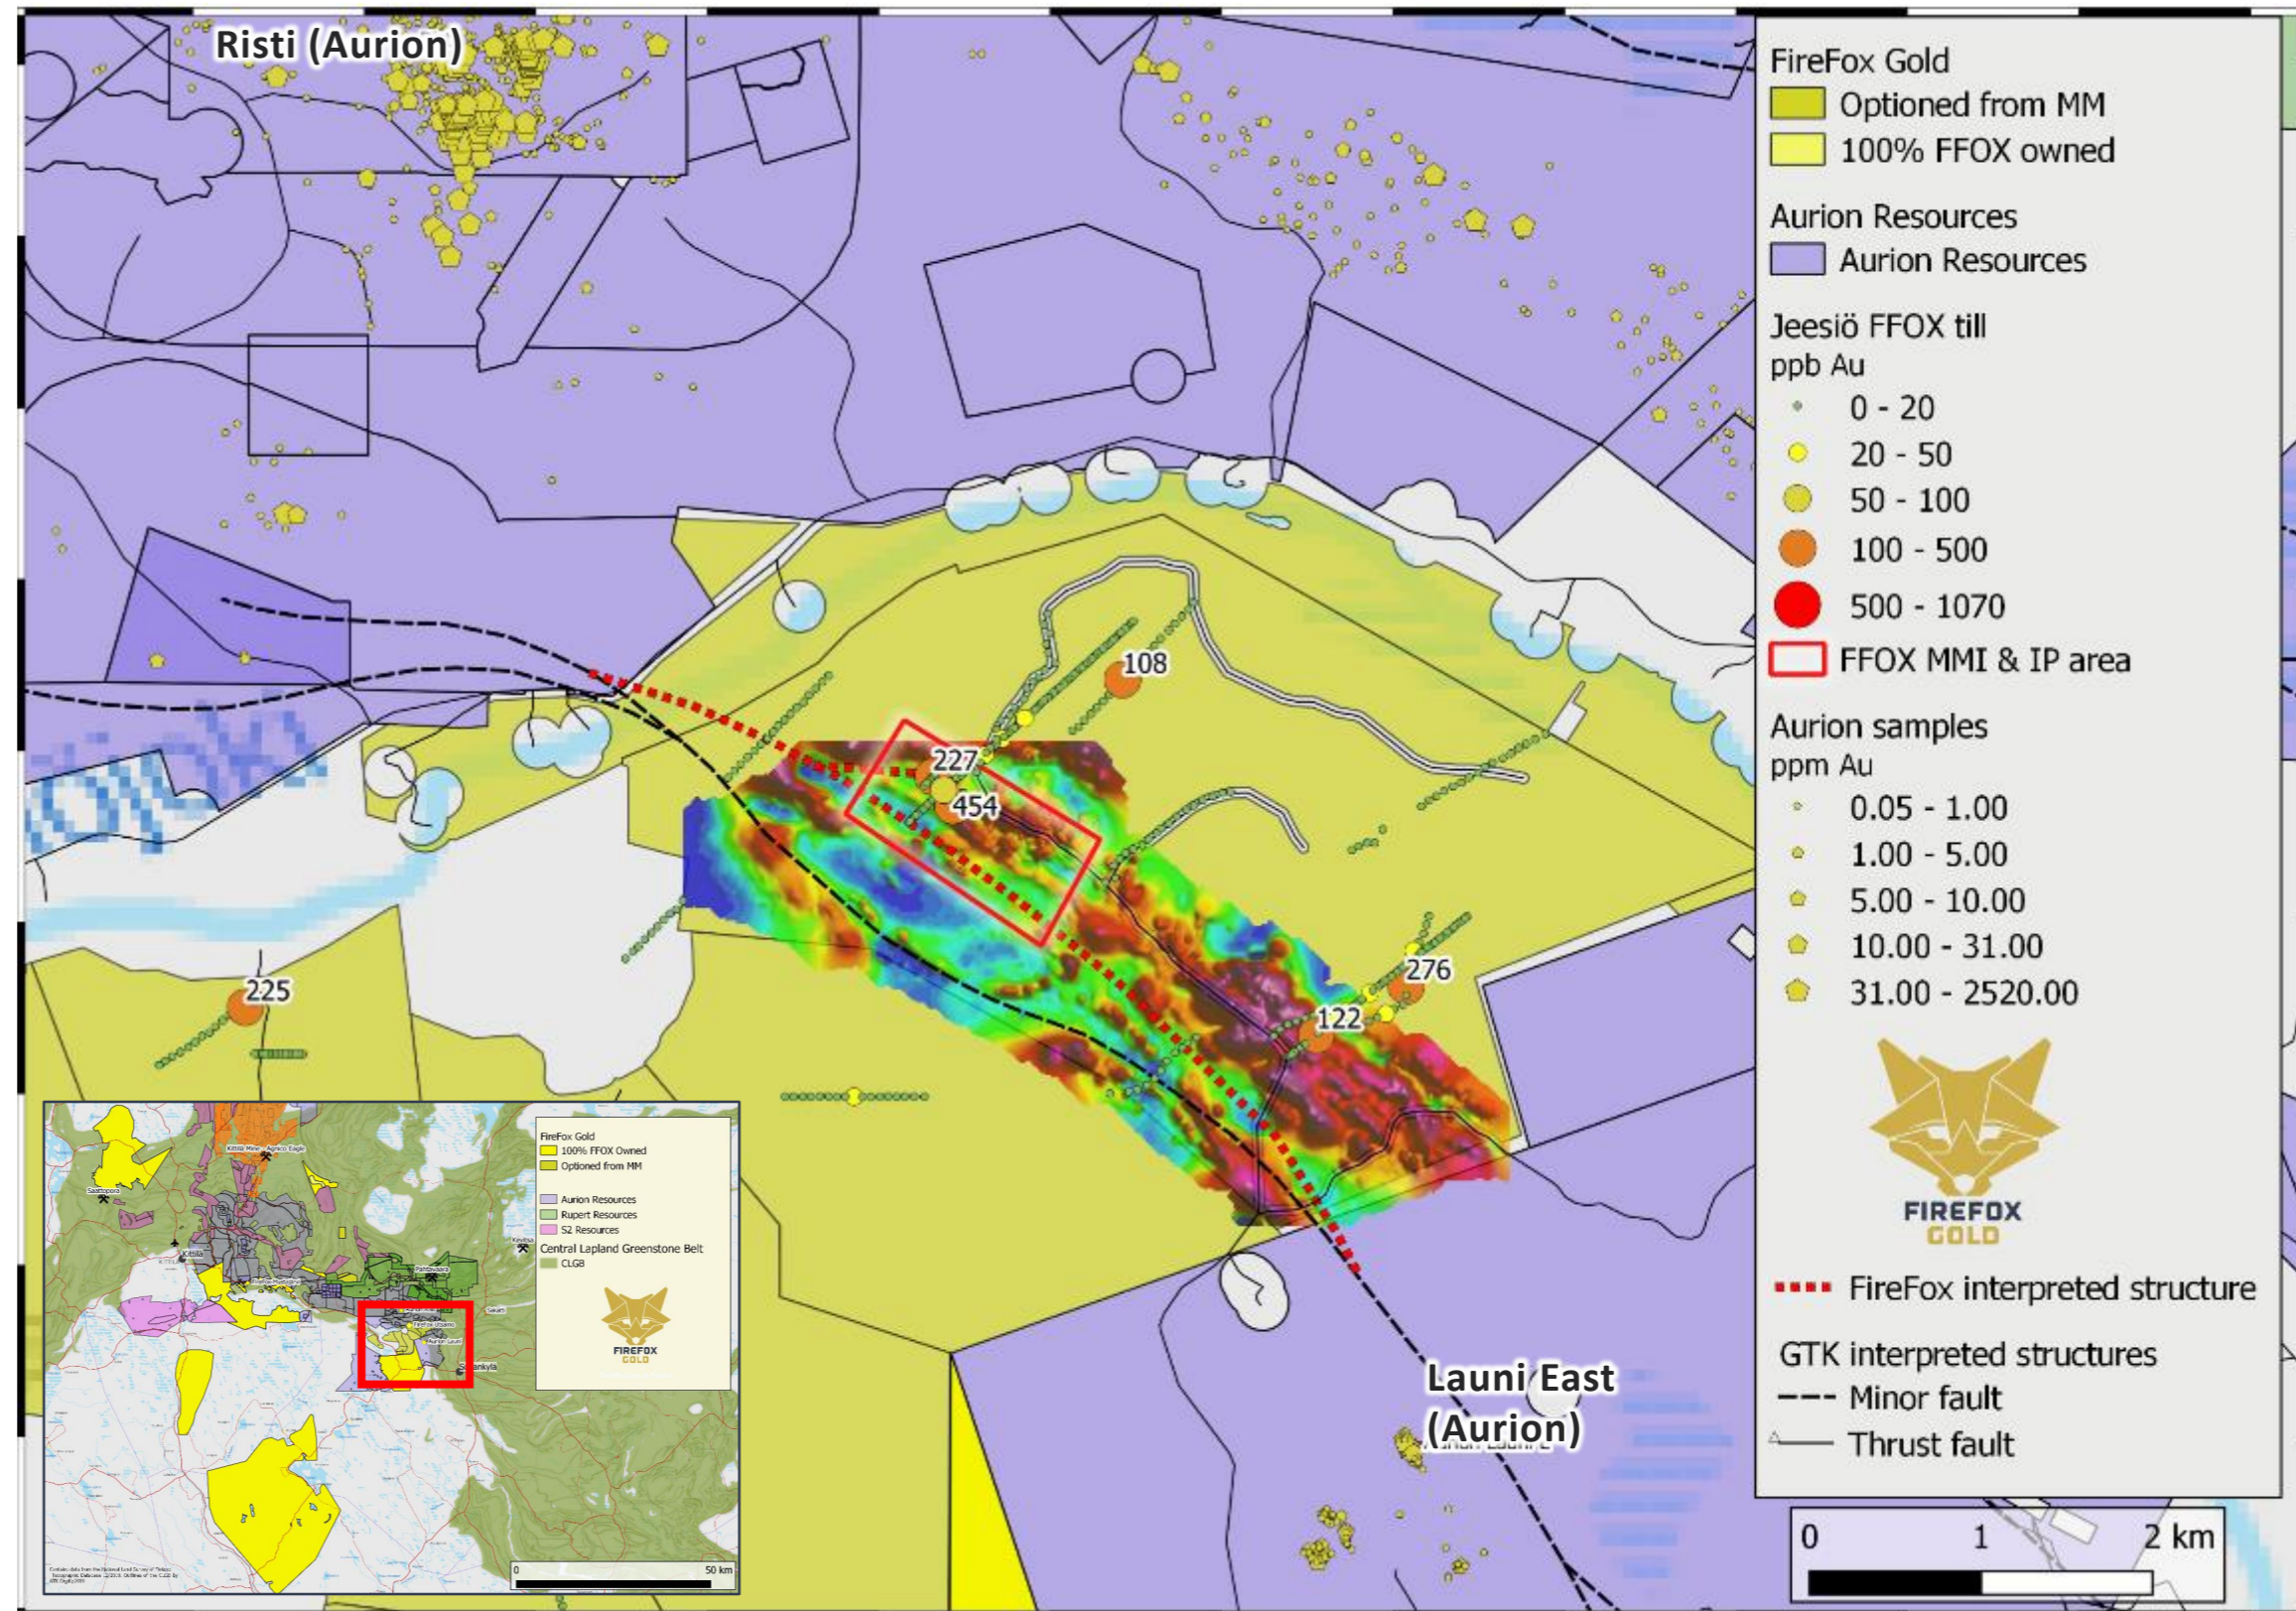

Magnetic survey results identified a 2.8 km long structurally distinct zone believed to be part of the Sirkka Shear.

Utsamo target hosts an important flexure in the Sirkka Shear Zone which may help to focus mineralization.

Zone is associated with numerous gold in till anomalies; follows the contact between mafic intrusive rocks and metasediments.

Integrated geochemical and geophysical exploration surveys confirm the continuation of the shear zone.

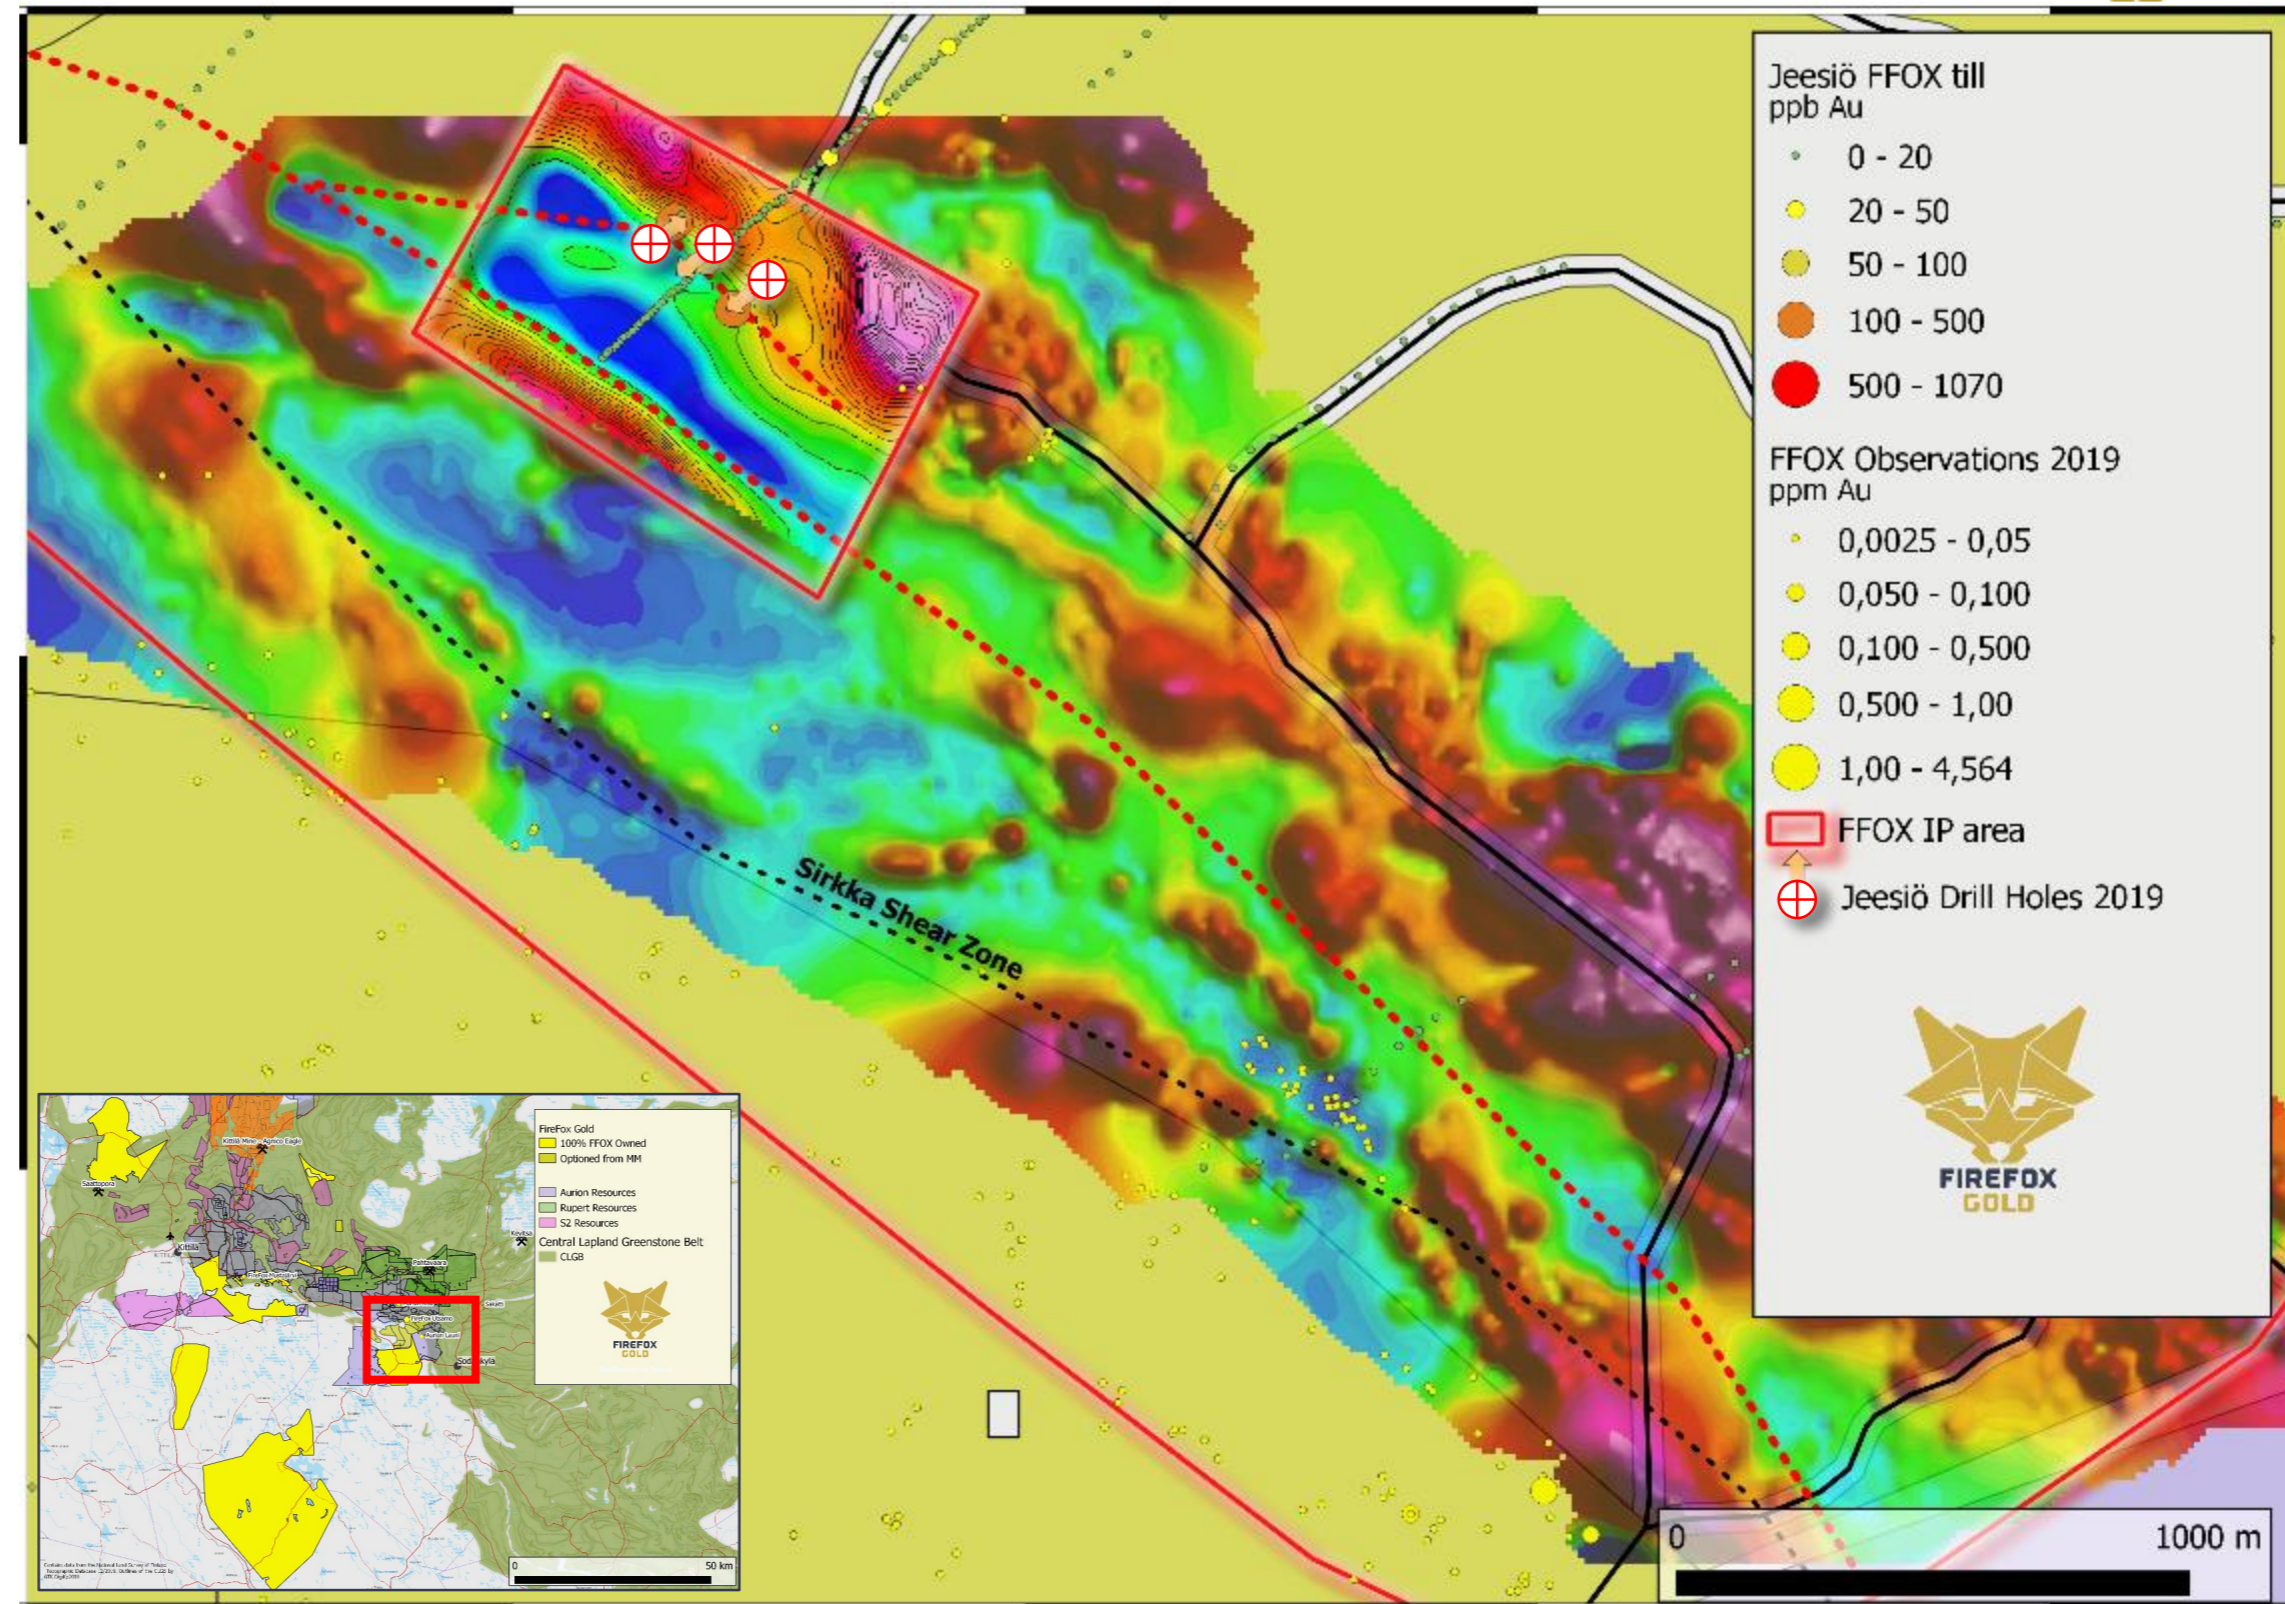

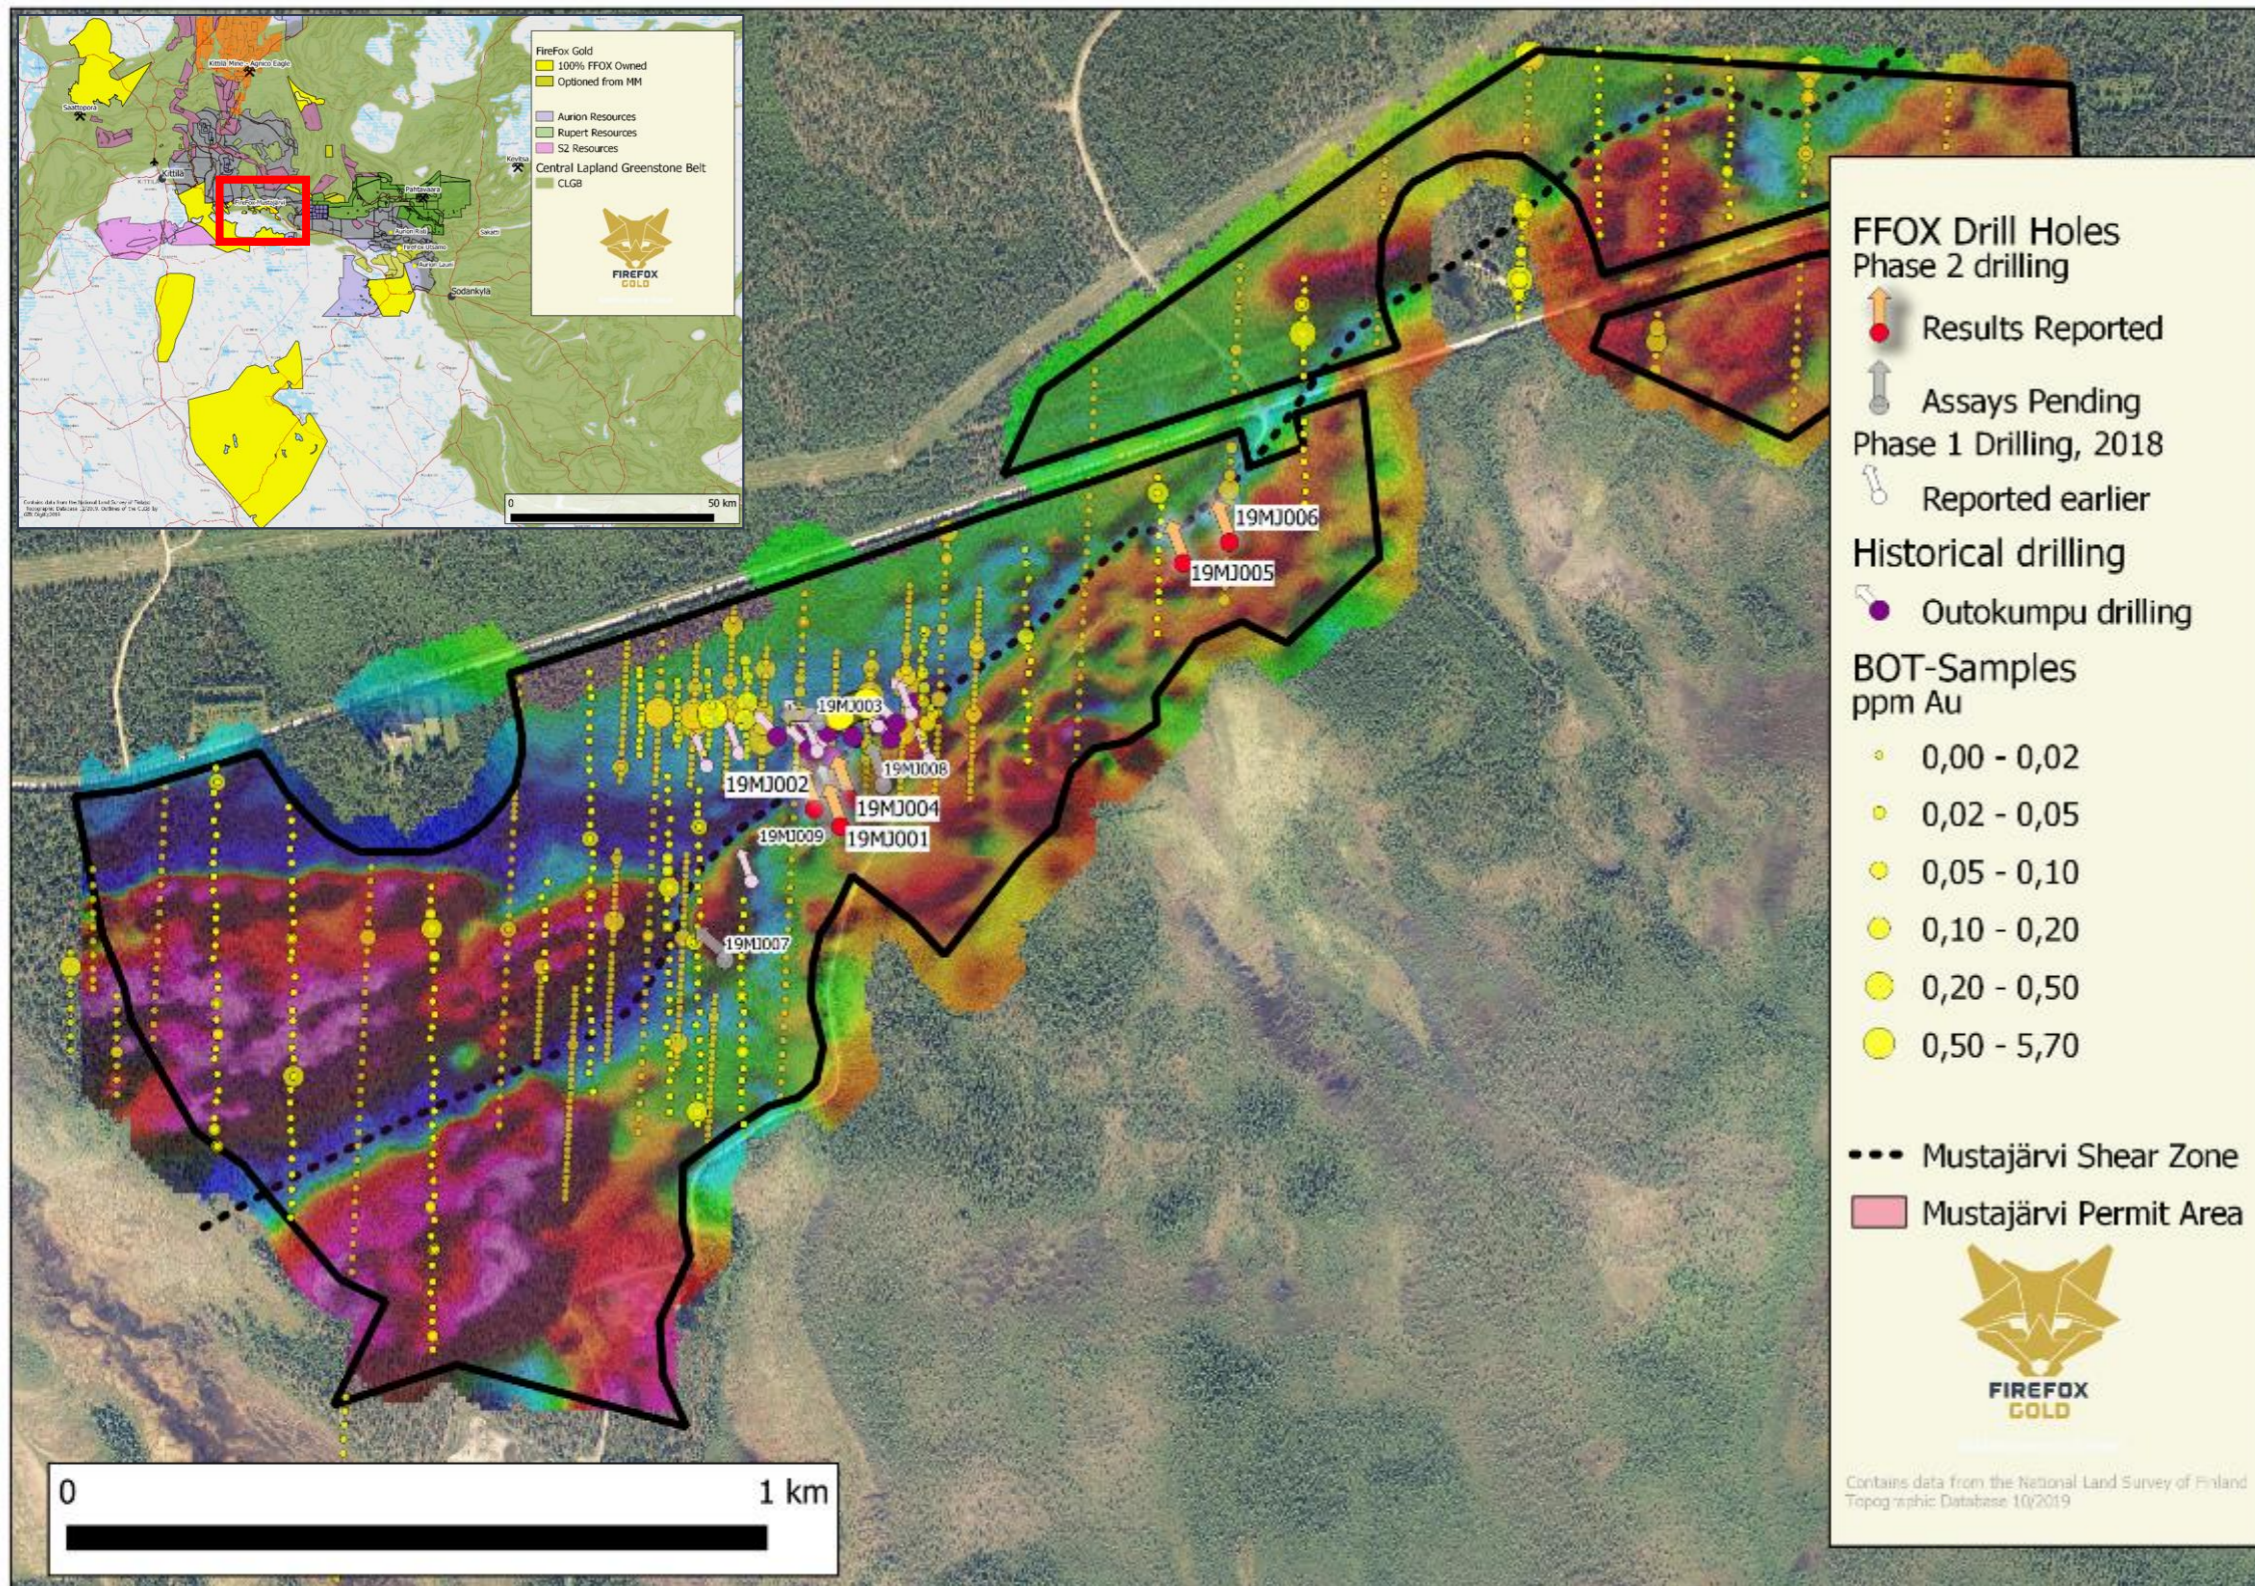

FireFox completed the first diamond drilling program at Utsamo in the fall of 2019.

3 holes were drilled for a total of ~ 350 metres.

The drill program is focused on the northern part of the 2.8 kilometre-long structural feature.

Additional target development was also completed at Homelampi, ~ 5km to the southwest, including ~250 metres of trench sampling.

150 hectare granted Exploration Permit and 1,372 new hectares of exploration reservations, (Sept 2018) 100% owned

Along the key Venejoki Thrust Zone, with highway access

Extensive historic database including till anomalies from GTK and Outokumpu

12 DDH's by Outokumpu in the 1990's & small scale gold exploitation by a local prospector^{4,5}

FireFox Base-of-Till (BOT) Sampling Program 2018: ~600 closely spaced (10 to 20m) till and top of bedrock samples

- **High gold extends anomaly from historic drilling and identifies important structures**

Chip channel sampling along **two intersecting mineralized structures** in the Central Zone identified high-grade gold.

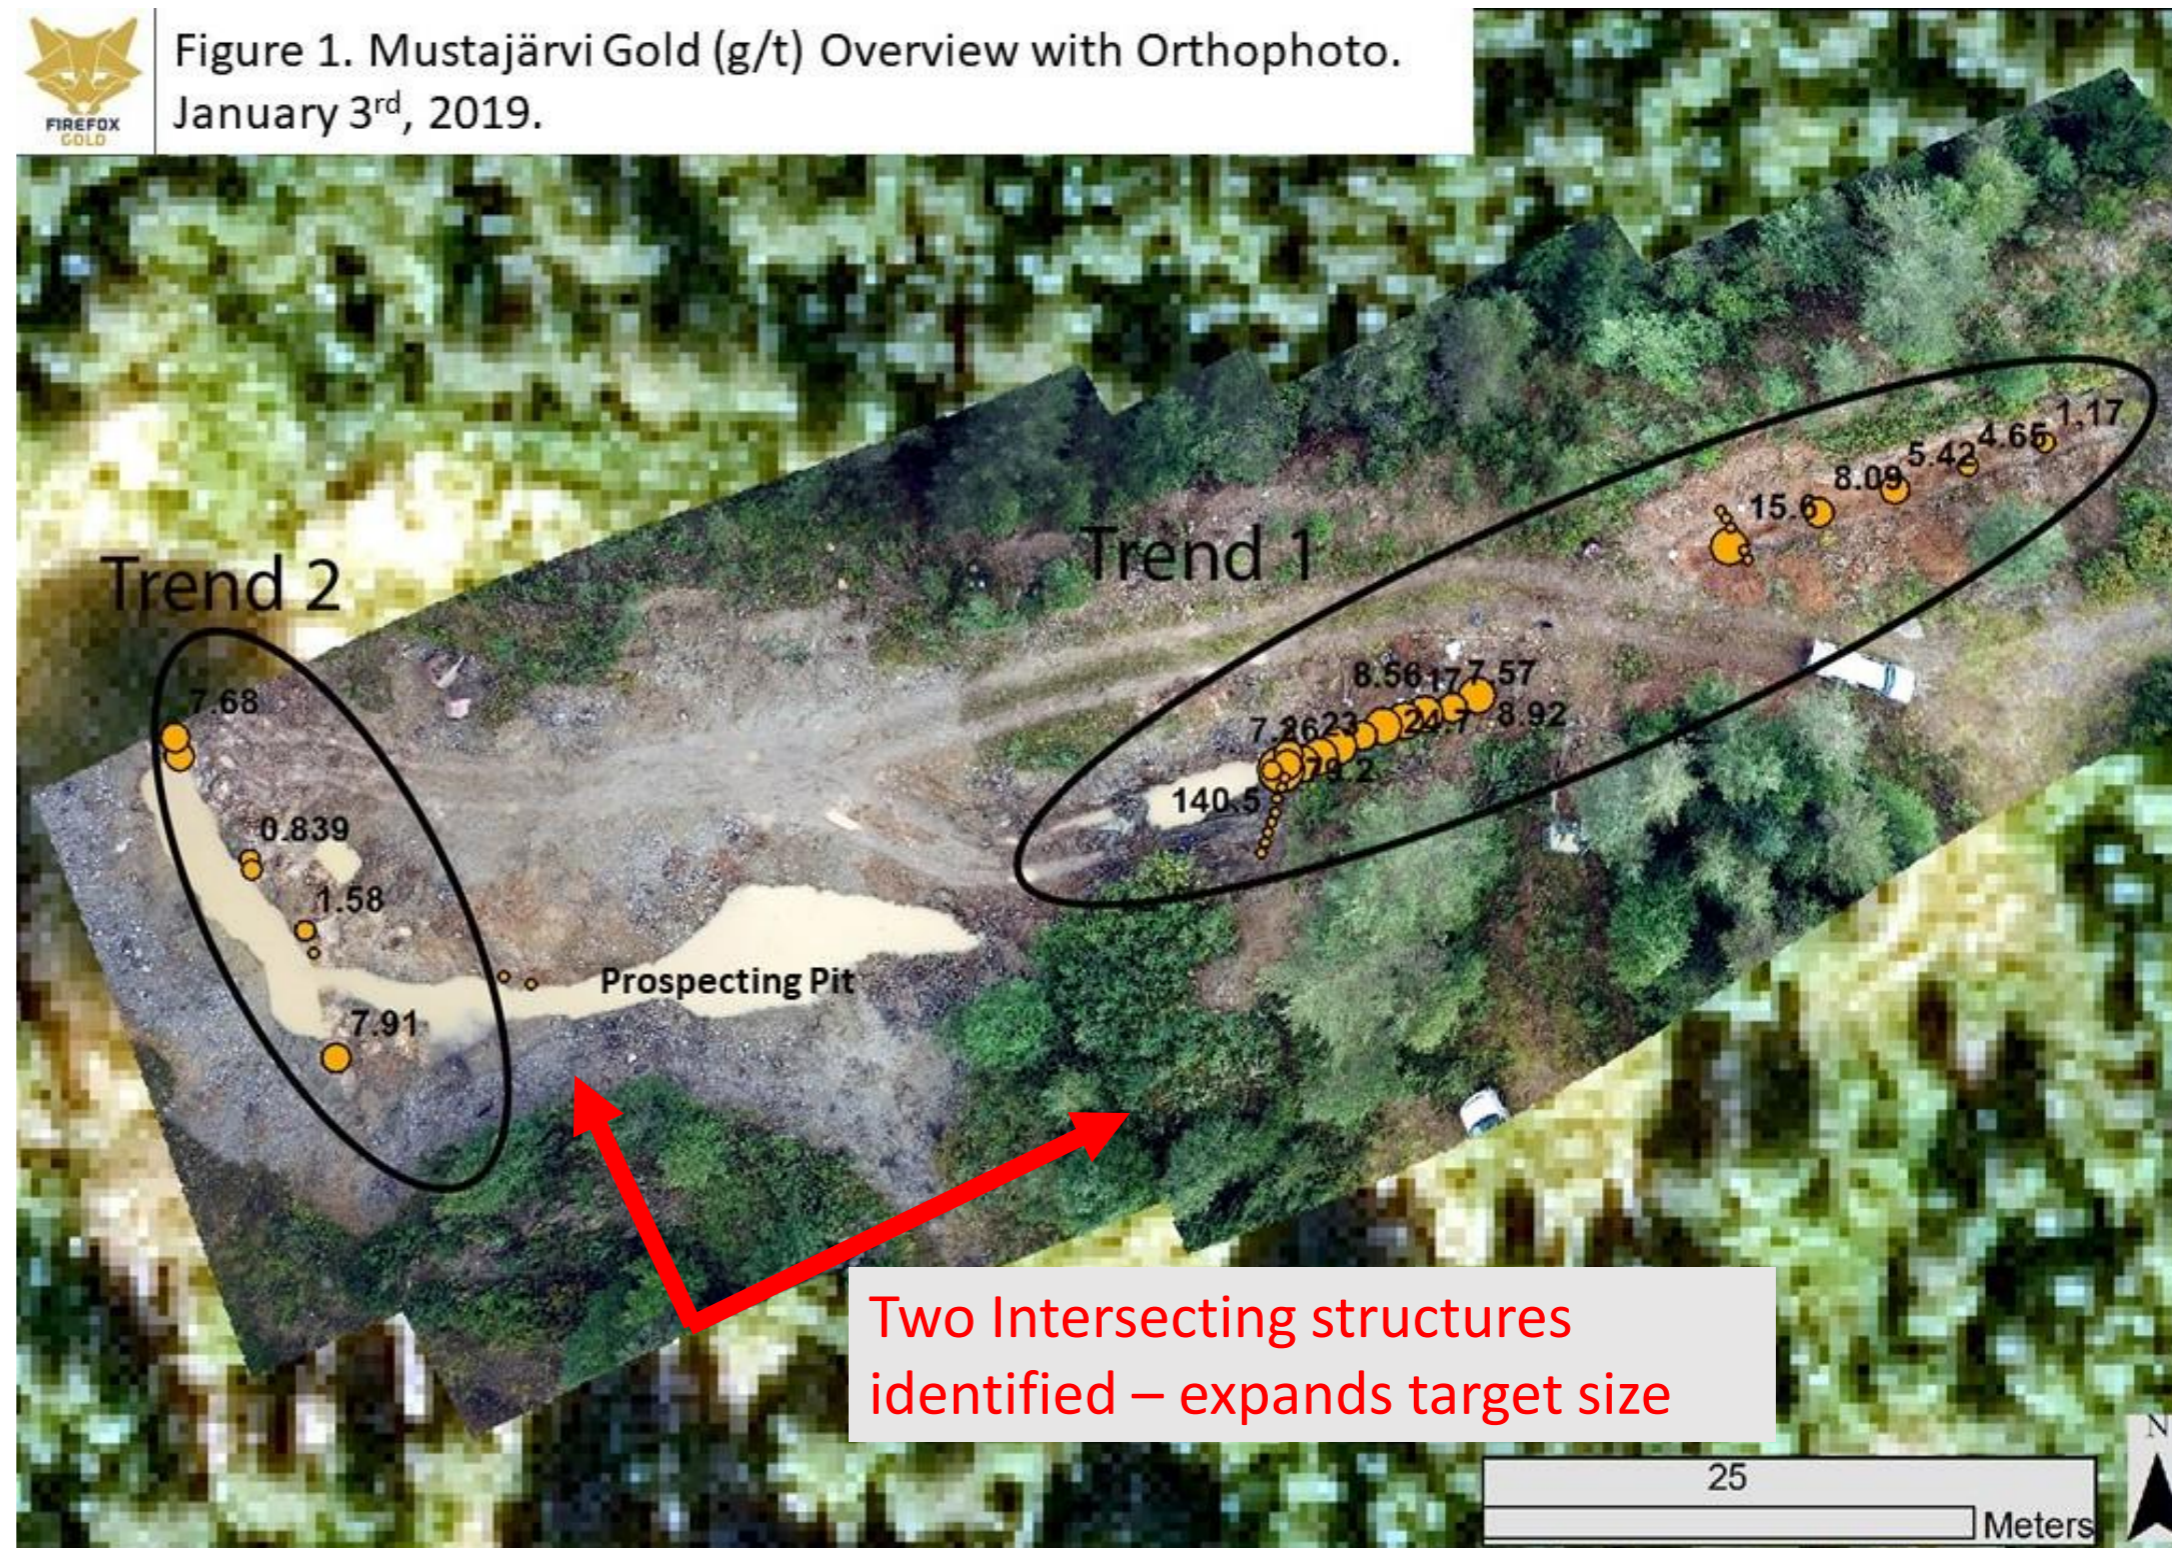

Results **expand the range of possible drill targets & the overall size potential of the gold system**

Consistent mineralization identified along strike for at least **45 metres** in Trend 1, averaging **21.6 g/t Au** and ranging from **0.66 to 140.5 g/t Au**

Associated elevated values of cobalt, ranging from 28.1 to 2,670 ppm (0.267%)

Figure 1. Mustajärvi Gold (g/t) Overview with Orthophoto. January 3rd, 2019.

Two Intersecting structures identified – expands target size

Phase 1 Program (8 holes, ~1,100 m):

- Confirmed historic results in Central Zone
- Hit **22.89 g/t Au over 3.95m**, including **2m @ 45 g/t Au** in 18MJ002
- Discovered new style of high-grade gold at depth
- Encountered first mineralization coincident with IP

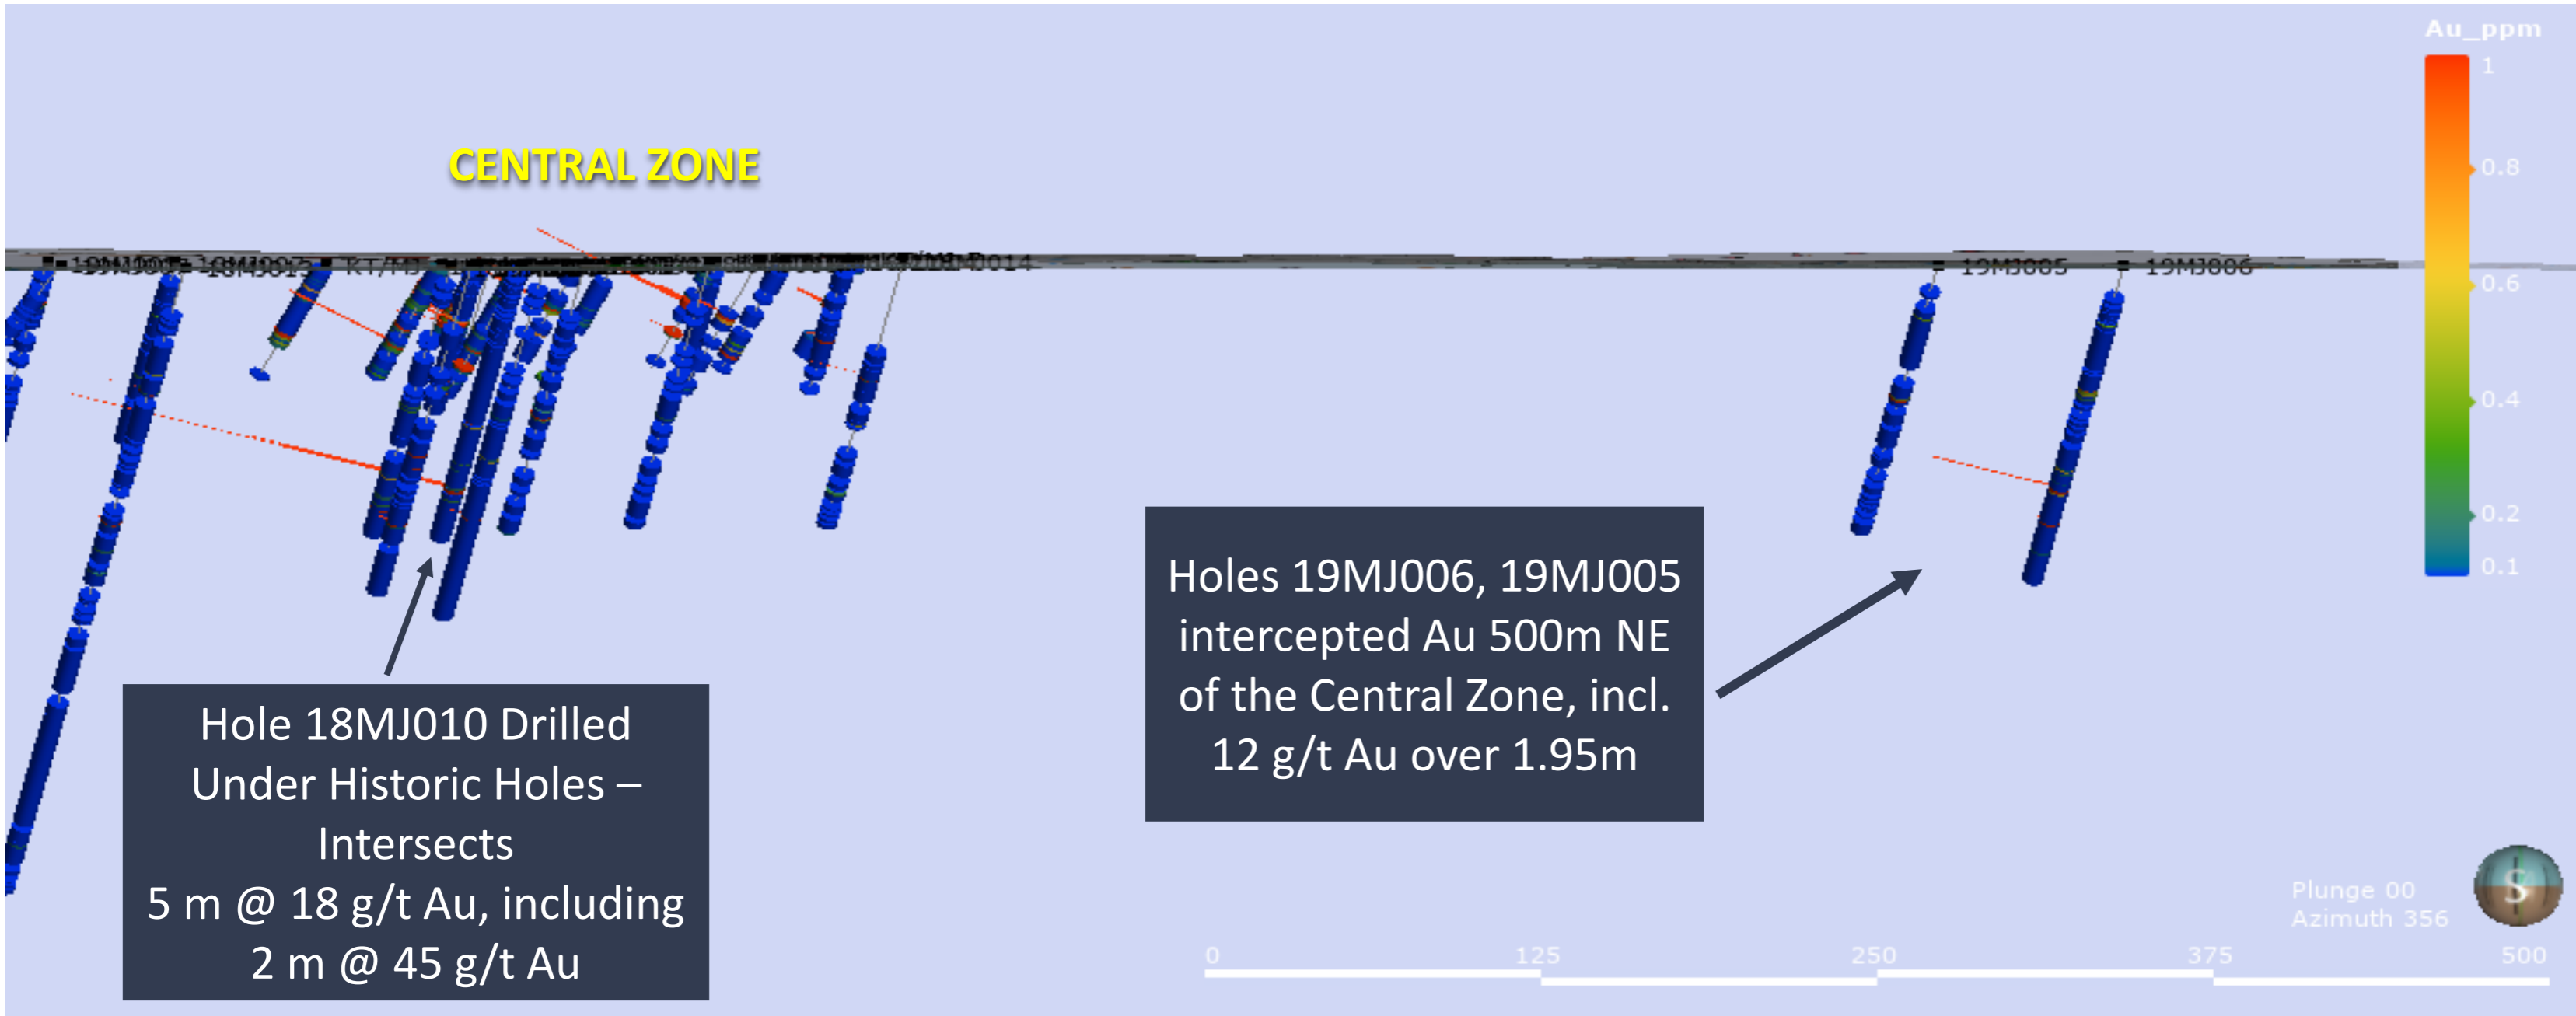

Phase 2 Program (9 holes, ~1,500m):

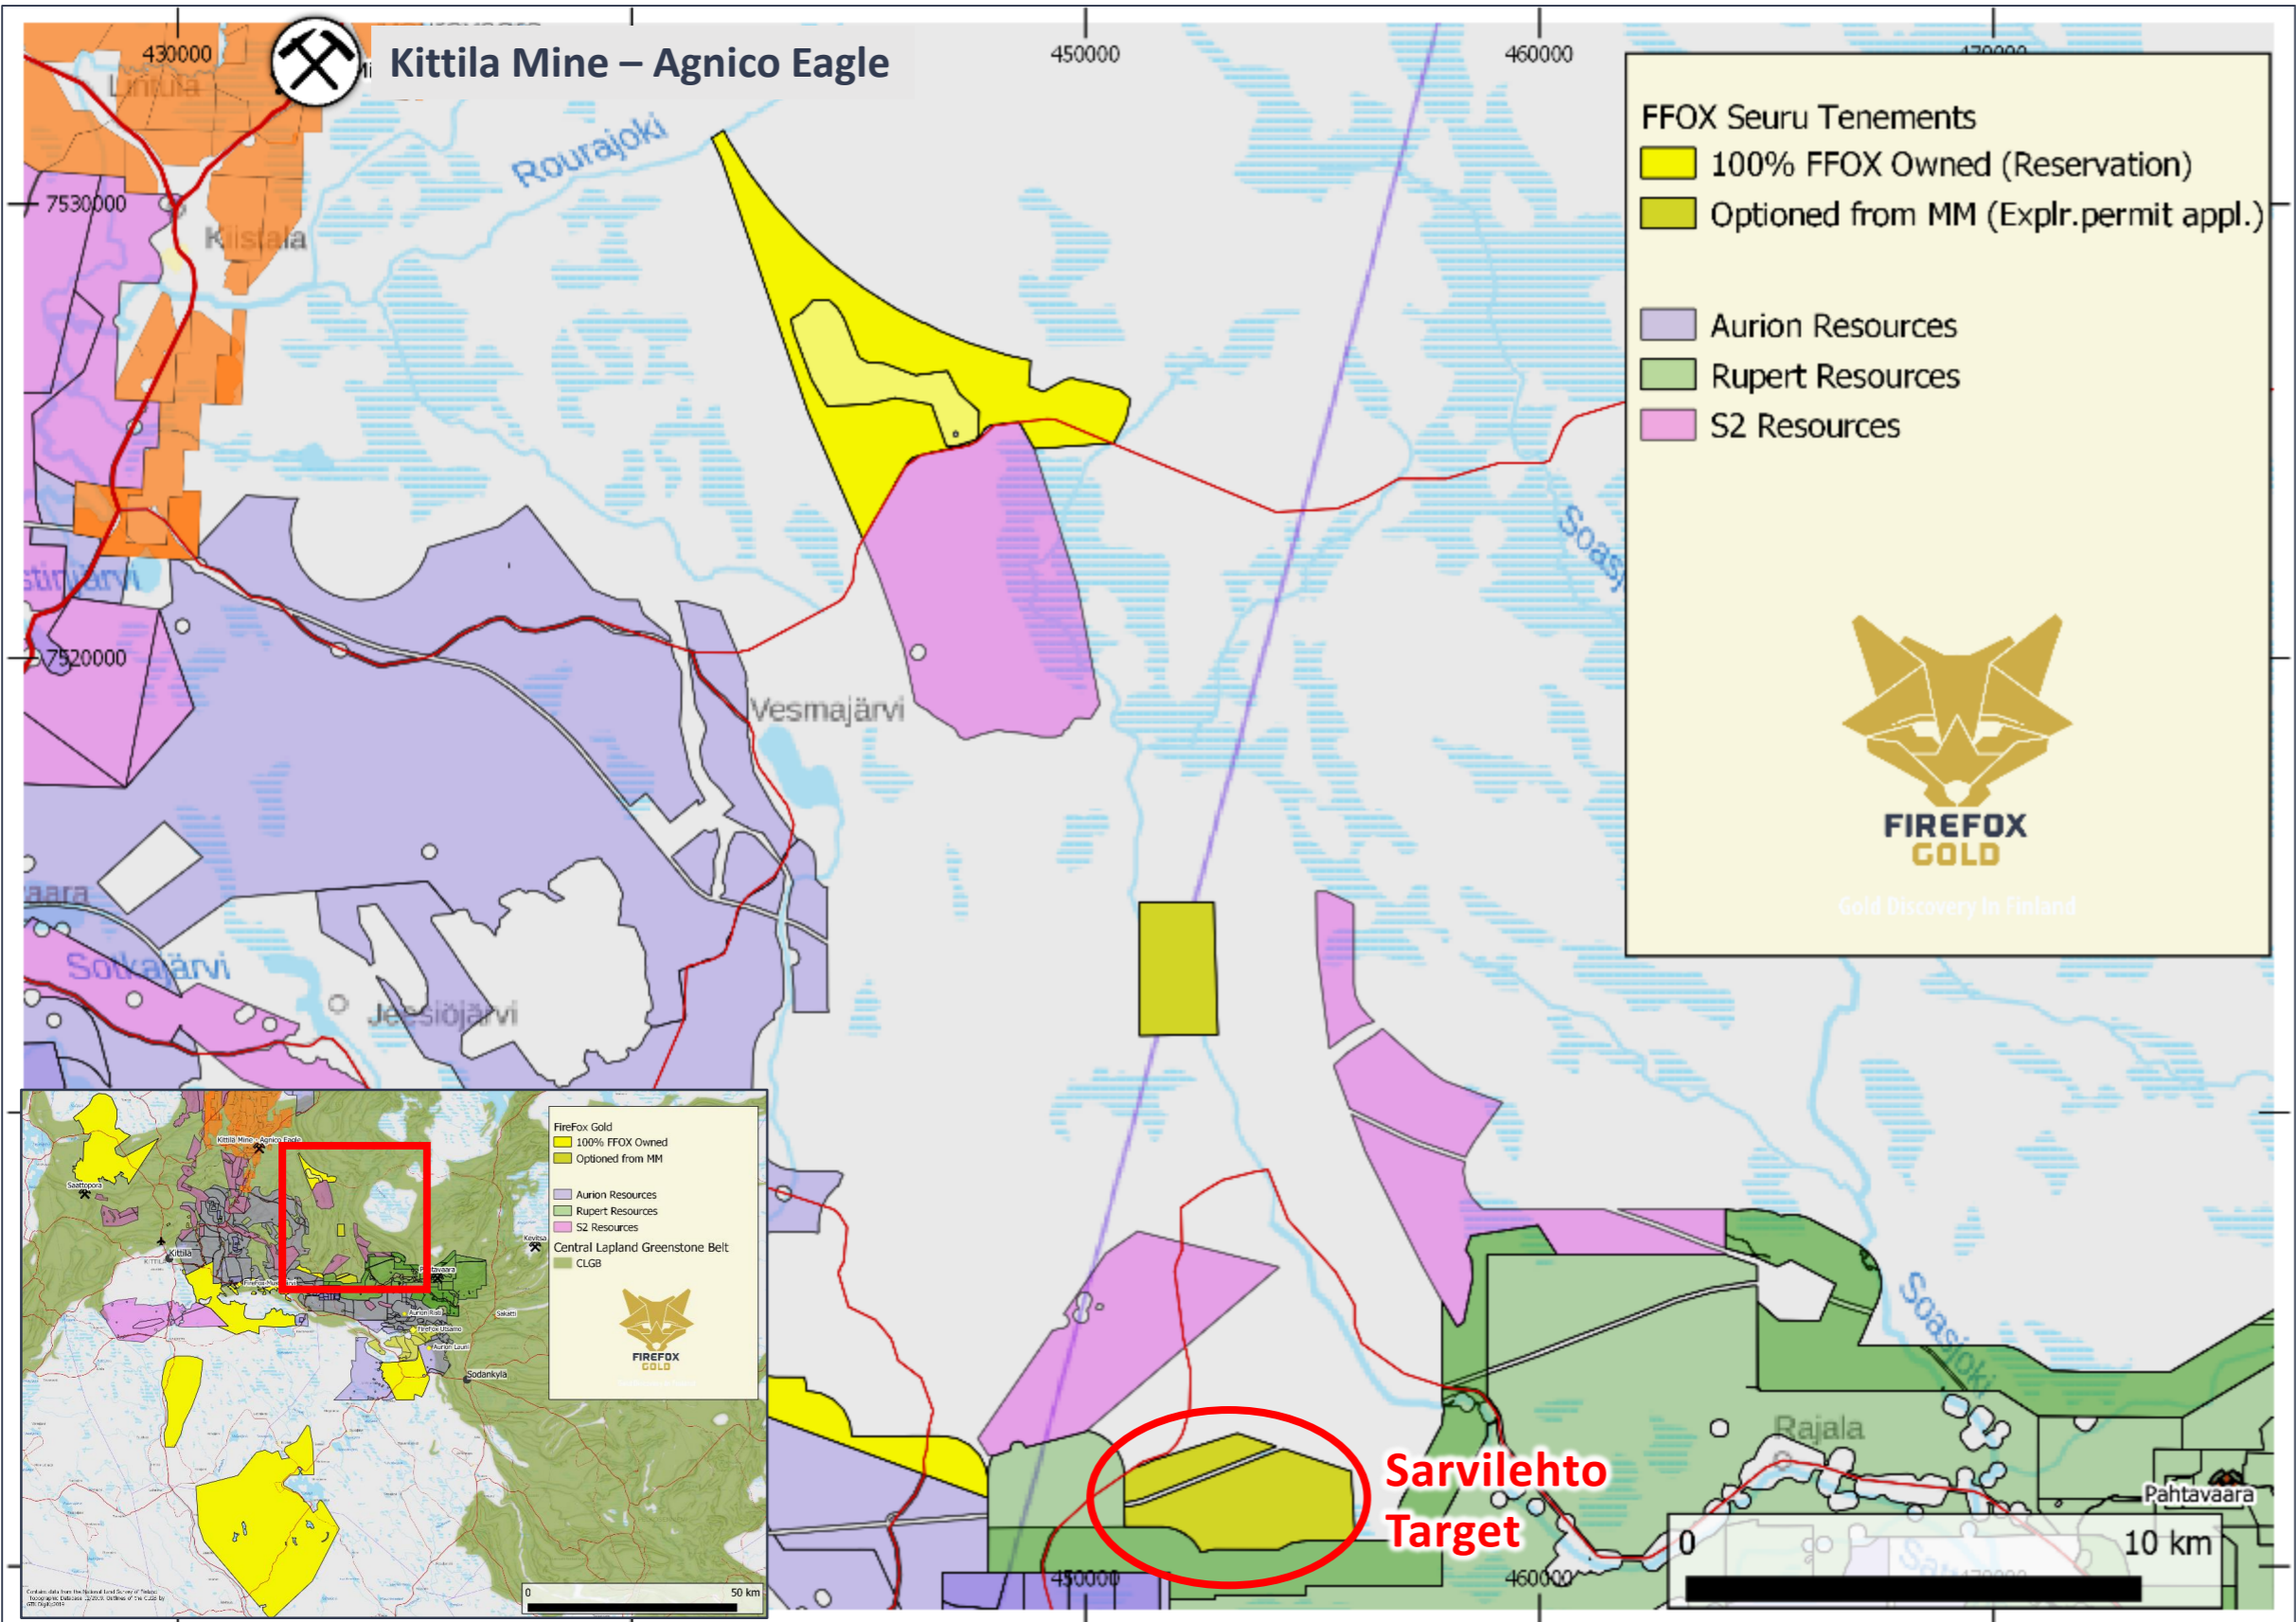

- 19MJ006, 19MJ005 intercepted Au **500 m NE** of the Central Zone, including **12 g/t Au over 1.95 m**
- 19MJ001, 19MJ002 and 19MJ004, in Central Zone confirmed the presence of gold veins at predicted depths 25 m along strike in both directions and 25 m down-dip.
- 19MJ007 intersected anomalous gold and remains a viable target

Expansion potential at depth and along strike

Multiple targets identified by combining historic GTK sampling & drilling, plus historic geophysics and till sampling.

Similar geology to Kittila Mine, (Agnico Eagle) Europe’s largest gold mine, extends onto Seuru properties.

The Sarvilehto target exhibits excellent gold potential in recent studies by the GTK (2009-2010).

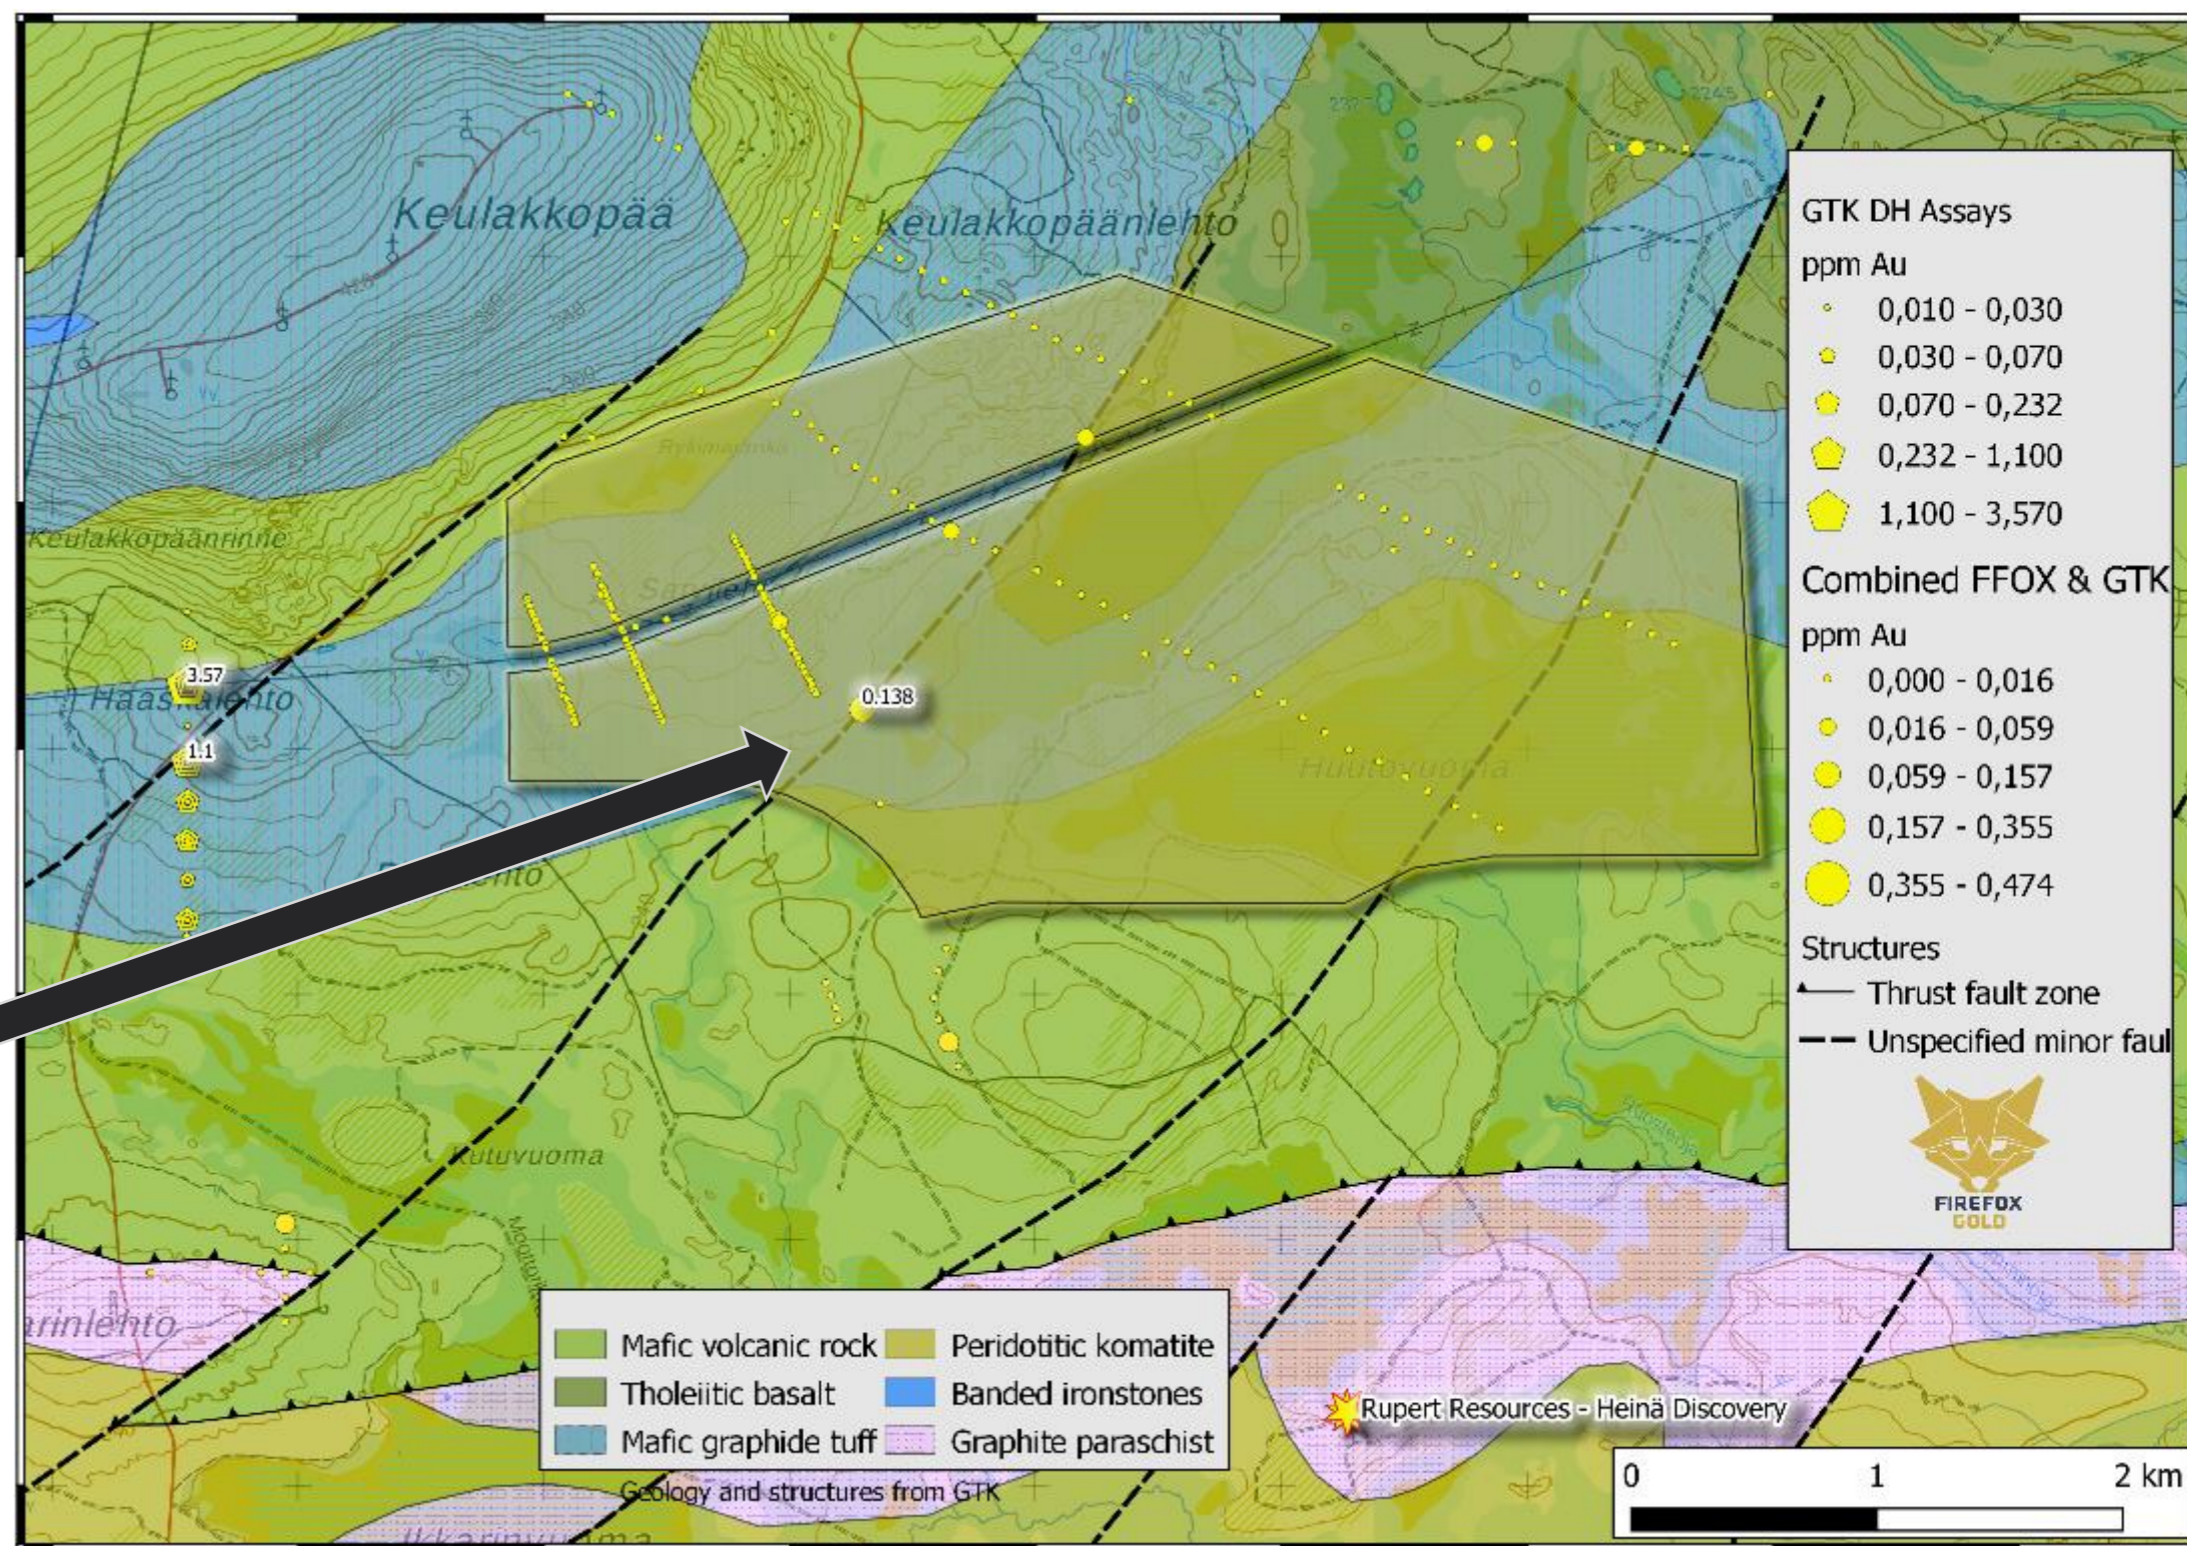

GTK drill results from 2009 intersected up to 3.57 g/t Au over 0.45 m (U441/2009/R8)4.

Micro panning of a 10kg heavy mineral sample revealed **118 gold micronuggets resulting in anomalous Au and As - a clear indication of Au prospectivity of the area.**

Assays from percussion till samples (GTK & recent FireFox) indicate enrichment of pathfinder elements such as Bi and As.

Ground magnetic studies and till sampling are planned for the Sarvilehto area.

2019 H2 MILESTONES & 2020 H1 EXPLORATION GOALS

	JUL	AUG	SEP	OCT	NOV	DEC	JAN	FEB	MAR	APR	MAY	JUNE
Bedrock mapping & sampling – Jeesiö		Completed	Completed									
Drilling – Jeesiö (Utsamo target)					Completed							
Trenching – Jeesiö (Homelampi target)					Completed							
Drilling - Mustajärvi Phase II			Completed	Completed								
Drill Data Compilation & Interpretation (Jeesiö & Mustajarvi)						In progress	In progress					
Geophysics - Jeesiö (Utsamo target)								Planned	Planned			
BOT - Jeesiö (Utsamo target)									Planned	Planned		
Sampling - Jeesiö and Utsamo											Planned	Planned

Planned 

GOLD DISCOVERY IN FINLAND

One of the few true “new” emerging gold belts.
A major player in a new terrain charged with
discovery potential...holding key lands with
advanced targets.

Proving ourselves as one of the fastest movers in Finland – experts on the mining law and extreme leverage on Finnish databases

High quality technical team and >100 years of exploration experience

Large property positions in two important gold belts and new prospective territory:
Control of ~1500km²

Notes: Drill hole numbering was not consecutive. Drilling is believed to be perpendicular to the dip of the mineralization, however true widths are not yet known and will be confirmed with additional drilling and geological modeling following the program.

* as reported 21 January, 2019

^ Internal dilution and tails are mineralized but assay below the Company's 1 g/t cutoff for high grade gold

Hole 18MJ010. Close-up image of massive pyrite with minor amounts of quartz in blebs and patches of tourmaline following foliation. This massive pyrite-quartz-tourmaline piece of core is part of the 0.5 metre wide interval assaying 73.7 g/t gold intersected at a depth of 126.5-127 metres. (See News Release dated 01/21/19)

~1,500 km² of Applications, Reservations & Claims, Wholly-Owned or Optioned with Favourable Terms

Central Lapland Greenstone Belt:

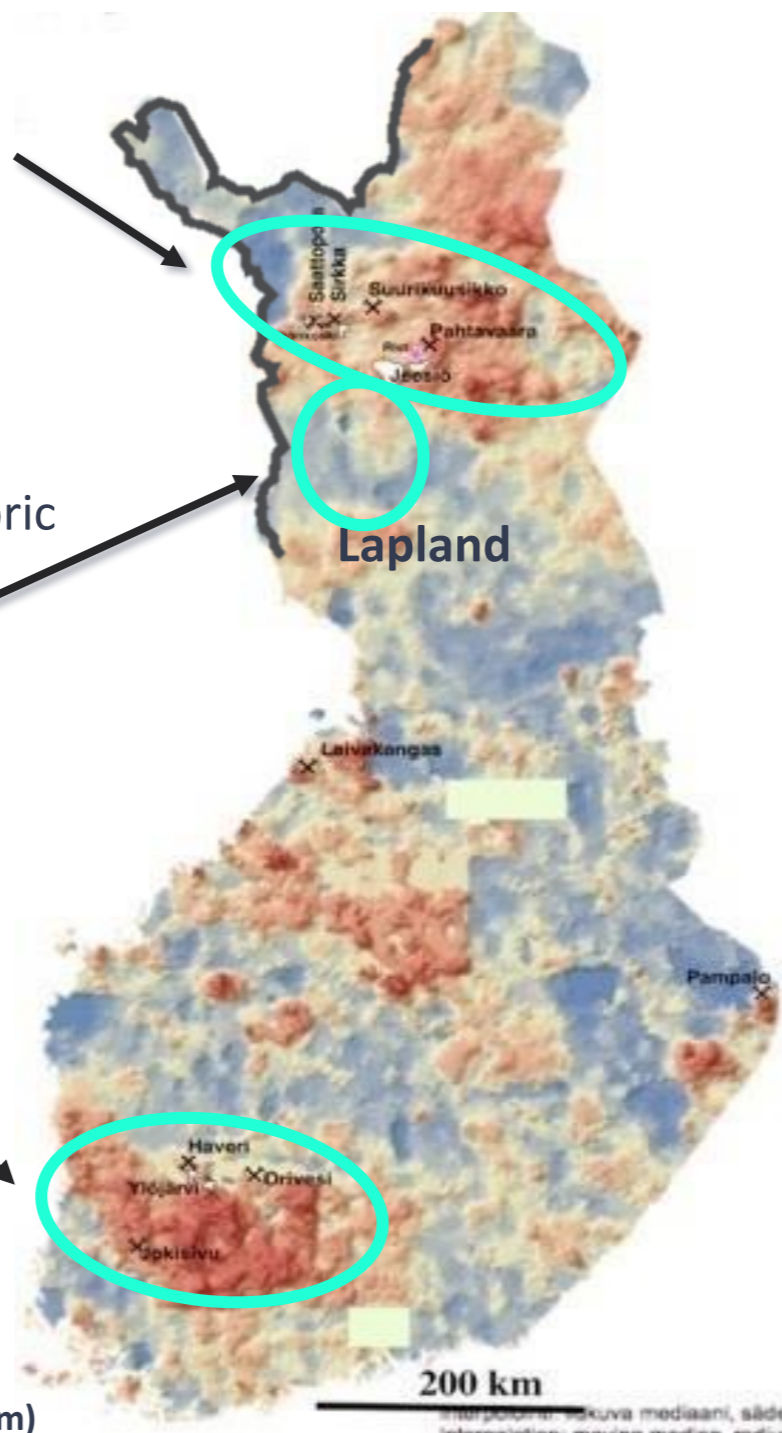

- Mainly orogenic gold targets
- Significant historic investment
- Extensive historic databases including drilling
- Extensive gold in till anomalies in historic surveys⁴

Kierinki Schist Belt:

- New prospective gold region

Tampere Schist Belt:

- High Au in till anomalies in historic surveys⁴
- Gold production & historic drill intercepts by other operators in district⁴

- ² Niiranen, T., Lahti, I. and Nykänen, V. (2015) *The Orogenic Gold Potential of the Central Lapland Greenstone Belt, Northern Fennoscandian Shield*. In W.D. Maier, R. Lahtinen, H. O'Brien, Eds., *Mineral Deposits of Finland* (pp733-752). Elsevier Inc.
- ³ Results from other companies in Finland, including properties proximal to those controlled by FireFox, are not indicative of expected FireFox results, as there has been insufficient exploration on the properties held by FireFox.
- ⁴ Source: Geological Survey of Finland
- ⁵ FireFox has not done sufficient work to verify the historical drilling. These historic results also may not be indicative of future exploration results. Until such time as confirmed by FireFox and its QP's, these results are not to be relied upon. These historic drill hole results are selected to indicate the character of veins and associated mineralization, there may be internal waste and dilution that is not reflected here. These drill results are reported to have suffered from significant core loss due to faulting and fracturing therefore widths may not represent true thickness.
